## Agenda No

# Cabinet - 17 November 2005

# 2005/06 Annual Efficiency Statement Mid-Year Update

# **Report of the County Treasurer**

### Recommendation

Cabinet are asked to:

- Note the latest forecast of efficiency gains for 2005/06,
- Approve the draft 2005/06 Annual Efficiency Statement mid-year update attached at Appendix A for submission to the Government, and
- Authorise the County Treasurer, in conjunction with the portfolio holder, to make any changes necessary to the 2005/06 Annual Efficiency Statement midyear update prior to its submission.

## 1 Introduction

1.1 In April 2005 the County Council, along with all other local authorities, submitted its 2005/06 forward-looking Annual Efficiency Statement (AES) to the government. Authorities are now required to submit a mid-year update by 17 November 2005, although this is voluntary for authorities such as Warwickshire, with an "excellent" CPA rating. This report updates Cabinet on our planned efficiency gains for 2005/06, provides explanations of the changes from our original submission and seeks Cabinet's approval to submit the mid-year AES to the government.

## 2 2005/06 AES Mid Year Update

2.1 When our 2005/06 forward-looking AES was submitted to the ODPM in April it was anticipating £7.485 million of efficiency gains in 2005/06, of which £3.523 million were considered to be cashable. Now the mid-year review has been completed a number of changes from the planned level of efficiency gains at the beginning of the financial year have been identified. The estimated total of efficiency gains that will be achieved in 2005/06 is now £4.951 million, of which £3.481 million is cashable. This is a reduction in efficiency gains from the planned level for 2005/06 of £2.534 million (£0.042 million cashable). Table 1 summarises the changes from the level of planned efficiency gains.

| Table 1: Variations in Forecast Efficiency Gains |         |           |                 |          |          |             |  |  |

| Total  | 7,485   | 3,523     | 4,951           | 3,481    | (2,534)  | (42)        |  |  |

2.2 The reasons for the changes in the levels of forecast efficiency gains have occurred for four main reasons:

- Delays and slippage in the implementation of projects to deliver the anticipated efficiency gains.
- Some efficiency gains occurring ahead of schedule and therefore having been already counted as part of the gains declared in 2004/05.
- Changes in the guidance from the government meaning that some forecast efficiency gains can no longer be counted towards meeting the 2.5% target or have to be assessed in a different way.
- New efficiency gains identified in 2005/06 and the full year effects of gains identified in 2004/05.

By service area the main reasons for the change in the level of planned efficiency gains are summarised below.

### 2.3 Adult Social Services – reduction of £909,000

There have been delays on the implementation of the projects forecast to deliver efficiency gains in Adult Social Services. Some of these gains may be achieved by the end of the financial year but at this point these cannot be quantified with any certainty. When the projects to deliver the efficiency gains are completed it is anticipated that the full-year effect will be as predicted in the original AES.

### 2.4 Children's Services – increase of £145,000

The key area identified for achieving efficiency gains has been to increase the ratio of foster care to residential placements, as foster care placements are believed to provide a better care option for the majority of looked-after children as well as being more cost effective. The increase in the planned efficiency gain is because the ratio has increased at a greater rate than expected and that this is expected to be sustained throughout the remainder of the year.

#### 2.5 Environmental Services – increase of £620,000

The increased levels of recycling and incineration that the County Council is achieving have delivered efficiencies by enabling the authority to avoid some of the increasing costs of landfill. These benefits are being delivered at a faster rate than originally forecast.

#### 2.6 Local Transport – reduction of £279,000

The reduction in the forecast efficiency gains is primarily due to slippage in the projects that were being used to bring about the planned efficiencies. There have been delays in agreeing the contract for advertising on street furniture ( $\pounds$ 100,000) and the benefits of the Carillion contract are being accrued more slowly than expected due to the problems with the contract in 2004/05 ( $\pounds$ 92,000). The balance is due to new ODPM guidance on the calculation of procurement gains from the purchase of capital assets having to be spread over a longer time period.

#### 2.7 Non-School Education – increase of £46,000

The increase is due to the full year effect of efficiency gains that were made in 2004/05.

#### 2.8 Supporting People – increase of £292,000

The increase is mainly due to a new efficiency gain resulting from the renegotiation of contract prices.

#### 2.9 Corporate Services – increase of £86,000

The increase in forecast efficiency gains is the result of actions taken by support service departments to deliver the cash-savings included as part of the 2005/06 budget resolution. A higher proportion than expected have been delivered through efficiency improvements as opposed to cuts in services or reductions in service quality.

#### 2.10 Procurement – decrease of £137,000

The efficiency gain from the introduction of e-procurement is now expected to be less than forecast. The revised calculations have been made based on the level of gains achieved to date, which are felt to be sustainable.

#### 2.11 Transactions – increase of £142,000

This increased gain is the result of the continued growth in the use of webenabled services and the use of the website to answer queries, releasing increased staff time for other activities.

#### 2.12 Miscellaneous – decrease of £2,529,000

It is this area that has seen the biggest drop in the level of efficiency gains now forecast from those planned at the beginning of the year. This is due to three significant changes:

• ODPM Guidance issued since the submission of the original AES now states that the investment in the County Councils infrastructure funded by third party contributions, such as section 106 agreements, can no longer be included unless it can be proved that the investment

would have gone ahead at the same level had the funding not been available. This change in guidance reduced our planned efficiency gains by £1.450 million.

- There has been slippage in the expected disposal dates of surplus assets, particularly the sale of surplus land at Aylesford, resulting in a £0.571 million reduction of cashable gains. Once the assets are disposed the gains will be realised in subsequent years.
- An efficiency gain for £0.500 million relating to the reduction of departmental overheads cannot be calculated with any certainty until after the end of the financial year and so it is considered prudent not to include this gain in the AES mid-year update at this stage.
- 2.13 The information summarised in paragraphs 2.3 to 2.12 above has been translated into the format of the mid-year AES submission required by the government. This is attached at Appendix A. Members are asked to approve the submission of the draft 2005/06 mid-year AES to the government.

### 3 In-Year Progress Towards Meting 2005/06 AES Mid-Year Update

3.1 Of the £4.951 million gains now being forecast for 2005/06 in the mid-year update £3.043 million have already been realised. This leaves a further £1.908 million efficiency gains forecast to be delivered by the end of the financial year. This is summarised in Table 2 below.

| Table 2: 2005/06 Efficiency Gains achieved to date          |                |                |  |  |  |  |  |
|---|----------------|----------------|--|--|--|--|--|
|   | Total          | Cashable       |  |  |  |  |  |
|   | £000           | £000           |  |  |  |  |  |
| 2005/06 AES Mid-Year Update forecast Gains achieved to date | 4,951<br>3,043 | 3,481<br>2,932 |  |  |  |  |  |
| Gains still to be achieved                                  | 1,908          | 549            |  |  |  |  |  |

3.2 At this point in time it is fully expected that at least the level of efficiency gains forecast in this mid-year update will be achieved by 31 March 2006.

## 4 Overall Progress to Date

- 4.1 Whilst the information in the report to this point indicates we are some way short of delivering the planned 2005/06 forward-looking AES, this needs to be put into the overall context of where the authority is compared to the overall target of achieving 7.5% on-going efficiency gains by the end of 2007/08.
- 4.2 In June 2005 we submitted an annual efficiency statement to the government showing gains in 2004/05 of £6.393 million. This mid-year update includes a

further efficiency gains in 2005/06 of £4.951 million. If these are delivered according to plan the authority would still be £4.594 million ahead of the target at the end of 2005/06. The overall progress to date against the target is shown in more detail in Table 3 below.

| Table 3: Progress on Meeting the Efficiency Gains Target |            |                |           |                                  |           |         |  |  |  |
|--|------------|----------------|-----------|----------------------------------|-----------|---------|--|--|--|
| Year   | Cumulative | Total Efficier | ncy Gains | Cumulative Cash Efficiency Gains |           |         |  |  |  |

| 2007/08  | 20.250     | 13.608         | +6.642    | 10.125                           | 8.315     | +1.810  |  |  |  |

## 5 Next Steps

- 5.1 Following the submission of the 2005/06 mid-year update to the government the next deadlines are:
  - to submit the 2006/07 forward-looking Annual Efficiency Statement to the government on 15 April 2006, and
  - to submit the final 2005/06 backward looking Annual Efficiency Statement on 16 June 2006.
- 5.2 Further reports to Cabinet over the next few months will reflect the development of a medium term efficiency strategy and plan, linked to the corporate business plan and departmental service plans, and the development of the processes and reporting arrangements necessary to give members confidence that the authority delivers value for money for the council taxpayers of Warwickshire and that the authority confidently expects to deliver the £20.250 million efficiency gains required by the end of 2007/08.

DAVID CLARKE County Treasurer

Shire Hall Warwick

17 November 2005

|               | <ul> <li>Explanation of Major variances:</li> <li>Complete the e.Government service development programme – The programme has now been further advanced and is generating a greater level of efficiency gains on top of those achieved in 2004/05.</li> <li>Promote customer adoption of new customer channels, particularly web self-service – see above.</li> <li>Extend a range of services handled through the customer service centre – The service centre is still in the process of becoming fully operational. As a result it is too early to calculate any accurate efficiency gains.</li> <li>Establish a pilot one-stop shop initiative in partnership with Warwick District Council – The service centre is still in the process of becoming fully operational. As a result it is too early to calculate any accurate efficiency gains.</li> <li>Continue collaboration with the District and Borough Councils through the Warwickshire On-Line Partnership to establish a consistent approach to customer access – The gains were achieved in 2004/05. No additional gains in 2005/06</li> </ul>   |                                 |                              |             |               |                                  |            |  |  |  |
