**Note**

Two outputs in the strategy do not yet have assigned measures. These are:

- People will have equitable access to screening and prevention services to help them avert ill health
- Communities that understand dementia issues and support dementia sufferers

4: Ensure that people with disabilities have the same choice, control and freedom as any other individual - at home, at work and as members of the community

Of 9 indicators identified for this outcome, 3 have seen a positive change, 3 remain fairly stable and 2 have changed negatively. The first indicator is not rated as good or bad.

Service users and carers who find it easy to find information about support ✓	People receiving carer-specific services in the year to 31 March who received direct payments ✗	People receiving carer-specific services in the year to 31 March who received self-directed support ✗

**5: Provide additional support to other vulnerable groups of people**

All outputs do not yet have assigned measures. This is because they mostly focus on quality of service, rather than number of service users.

- Health and care services that better meet the needs of vulnerable people to accelerate improvement in their health and wellbeing outcomes
- Better mechanisms of identifying vulnerable people and ensuring that they are signposted to the most appropriate services
- Safe and suitable housing provided by the private sector

**6: Enable older people to be able to remain in their own homes and to live healthy lives for as long as possible**

Of 5 indicators identified for this outcome, 3 have seen a positive change and 2 have changed negatively.

**7: Take an asset based approach to working which values communities and the range of assets they possess**

All outputs do not yet have assigned measures.

- Organisations with an understanding of what community assets exist and how they can work in collaboration
- Services and resources in place that are based on community identified needs

**8: Work in partnership with our communities to build capacity and support them to increase their resilience, enabling them to better care for themselves within the community**

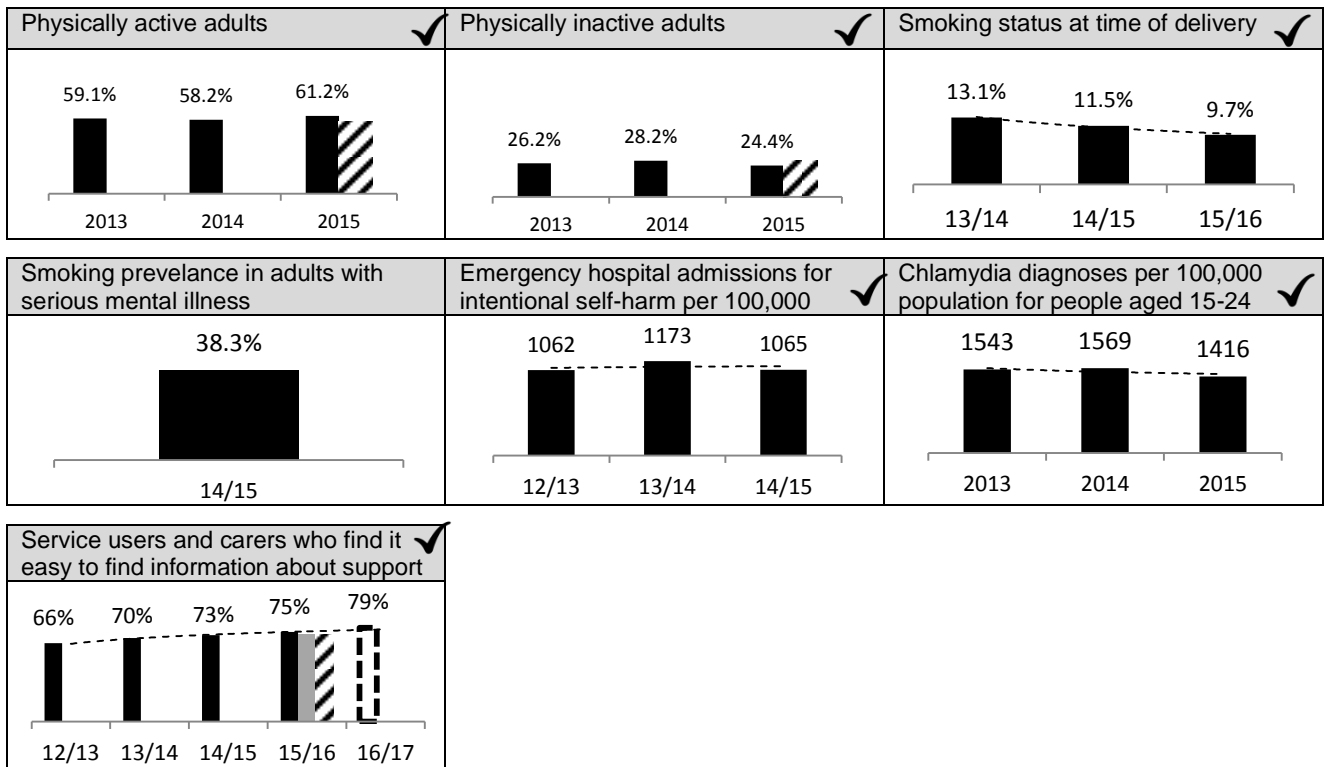

Of 6 indicators identified for this outcome, 5 have seen a positive change and 1 has changed negatively.

**9: Empower individuals and communities to take control and responsibility for their own and the community's health and wellbeing**

Of 10 indicators identified for this outcome, 6 have seen a positive change, 2 remain fairly stable and 1 has changed negatively. For 1 indicator there is not a comparator year.

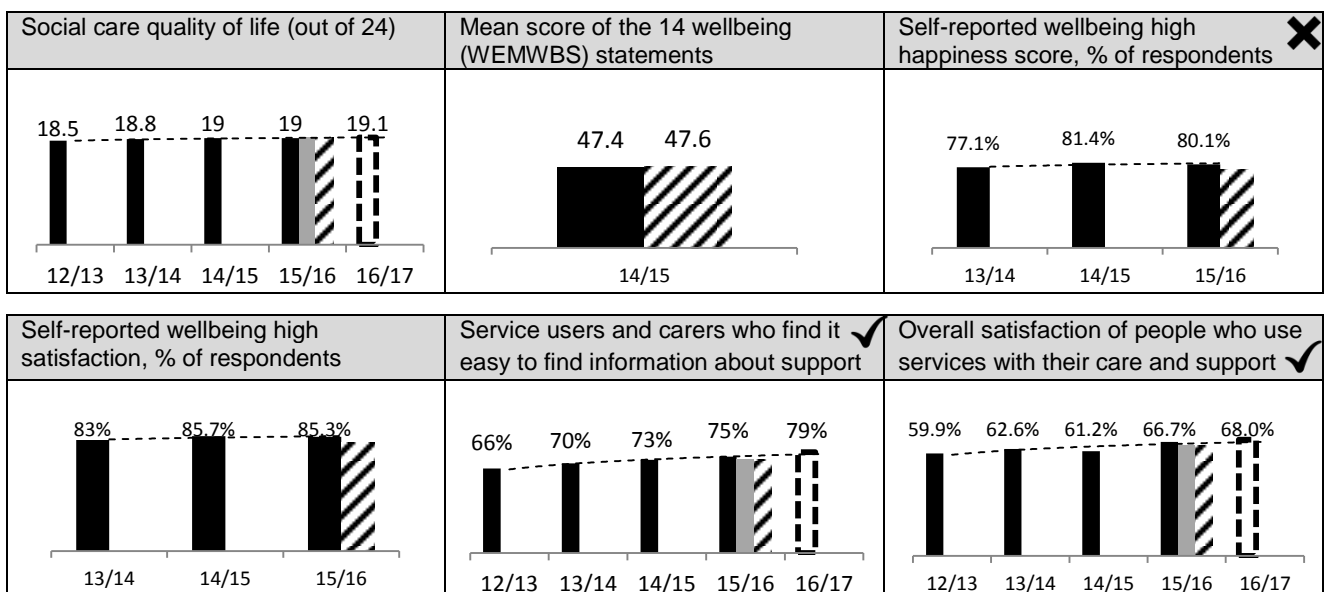

One of the outputs does not have measures assigned:

- Front line workers from a range of sectors and community leaders supporting Making Every Contact Count (MECC) and 5 Ways to Wellbeing

10: Ensure infrastructure, public services and resources are effective, accessible and tailored to those communities that need it the most

Of 6 indicators identified for this outcome, 2 have seen a positive change, 2 remain fairly stable and 1 has changed negatively. For 1 indicator there is not a comparator year.

## 11: Facilitate communities to take ownership of shaping and transforming local services

All outputs do not yet have assigned measures.

- Communities and organisations working together to co-design, produce and deliver integrated services
- Social enterprises established and working together with commissioners and organisations to deliver local services

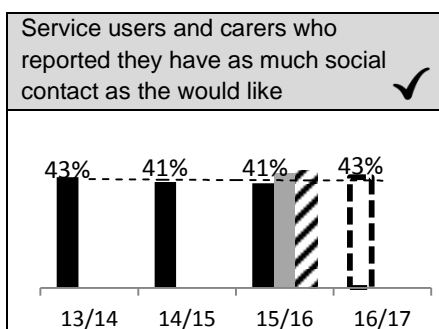

## 12: Improve educational attainment and access to learning at all ages

Of 3 indicators identified for this outcome, 1 has seen a positive change, 1 remains fairly stable and 1 is worse than comparators (no data from previous year to compare).

## 13: Facilitate communities to expand social capital and neighbourliness, building and increase in resilience

The one indicator identified has changed positively.

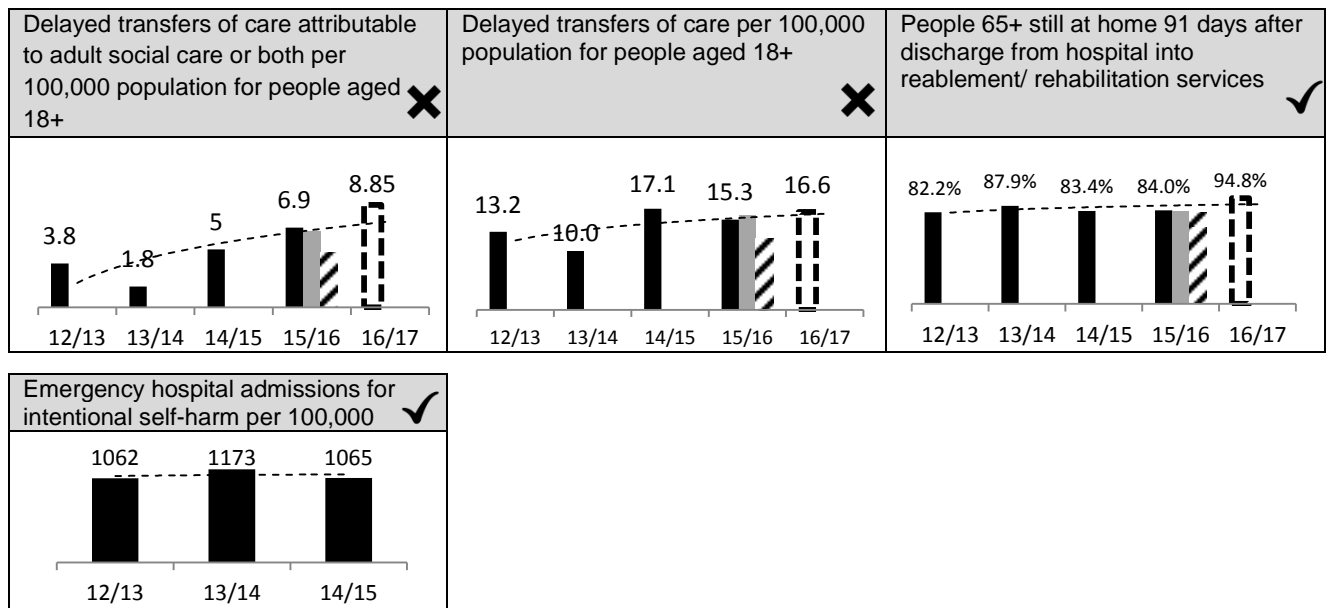

One output does not yet have assigned measures.

- Volunteers are community champions and supported to work with their community

## 14: Support people to remain healthy and independent, in their own homes for longer

Of 4 indicators identified for this outcome, 2 have seen a positive change and 2 have changed negatively.

## 15: Improve accessibility and visibility of 'front doors' to support people, to make the right choice, the easiest choice, informed by customer journey examples

All outputs do not yet have assigned measures.

- Redesigned services appropriately, having considered integration options
- Undertaken customer journey mapping of experiences at front door services
- Scoped the IT and infrastructure requirements needed to facilitate delivery

## 16: Improve care coordination in the community for high risk/cost patients

All outputs do not yet have assigned measures.

- Used appropriate engagement methods and worked with individuals, their carers and families to assist in the redesign of services
- Establish multi agency project groups to identify models that best fit the local areas, based around an integrated team approach. Using case management, linked to GP clustered practices
- Incorporated the requirement to align processes for accessing personal budgets

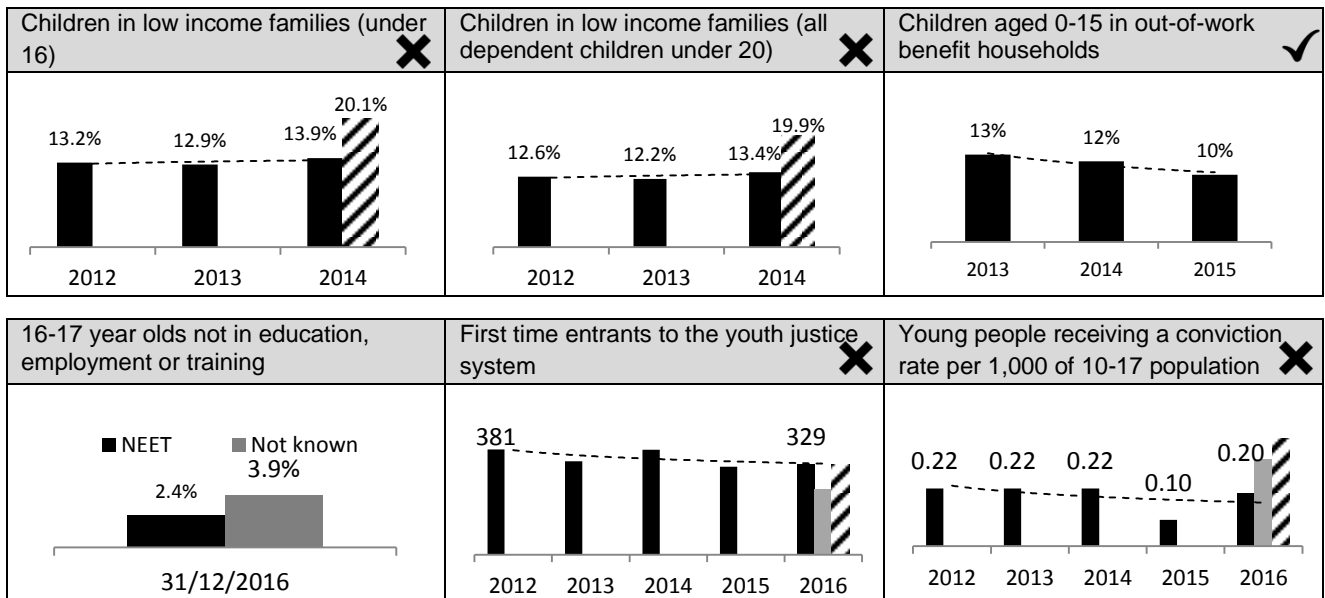

## 17: Improve data sharing, IT infrastructure and health and social care governance

All outputs do not yet have assigned measures.

- Establish compatible systems to enable sharing of data
- Enable the use of NHS numbers to be used as unique identifiers to share data and business intelligence, using a 'hub' where key data on individuals can be collated in a joint summary care record
- Developed a solution for the ability to send information confidentially and safely between organisations without compromising information governance

## 18: Improve partnerships across the wider social determinants of health

Of 6 indicators identified for this outcome, 1 has seen a positive change and 4 have changed negatively. NEET figures do not have a comparison for the previous year.

## Summary

The following outputs are yet to be assigned measures:

- People will have equitable access to screening and prevention services to help them avert ill health
- Communities that understand dementia issues and support dementia sufferers
- Health and care services that better meet the needs of vulnerable people to accelerate improvement in their health and wellbeing outcomes
- Better mechanisms of identifying vulnerable people and ensuring that they are signposted to the most appropriate services
- Safe and suitable housing provided by the private sector
- Organisations with an understanding of what community assets exist and how they can work in collaboration
- Services and resources in place that are based on community identified needs
- Front line workers from a range of sectors and community leaders supporting Making Every Contact Count (MECC) and 5 Ways to Wellbeing
- Communities and organisations working together to co-design, produce and deliver integrated services
- Social enterprises established and working together with commissioners and organisations to deliver local services
- Volunteers are community champions and supported to work with their community
- Redesigned services appropriately, having considered integration options
- Undertaken customer journey mapping of experiences at front door services
- Scoped the IT and infrastructure requirements needed to facilitate delivery
- Used appropriate engagement methods and worked with individuals, their carers and families to assist in the redesign of services
- Establish multi agency project groups to identify models that best fit the local areas, based around an integrated team approach. Using case management, linked to GP clustered practices
- Incorporated the requirement to align processes for accessing personal budgets
- Establish compatible systems to enable sharing of data
- Enable the use of NHS numbers to be used as unique identifiers to share data and business intelligence, using a 'hub' where key data on individuals can be collated in a joint summary care record
- Developed a solution for the ability to send information confidentially and safely between organisations without compromising information governance

## Data

	12/13	13/14	14/15	15/16	16/17
<b>ADULT SOCIAL CARE</b>					
The proportion of people who use services and carers who find it easy to find information about support	66%	70%	73%	75%	79%
Proportion of people who use services and their carers, who reported that they had as much social contact as they would like/ Social Isolation	-	42.90%	41.10%	40.60%	43.00%
