

PRUDENTIAL INDICATORS

Ratio of financing costs to net revenue stream

The ratio of financing costs to net revenue stream shows the estimated annual revenue costs of borrowing, less net interest receivable on investments, plus repayments of capital, as a proportion of annual income from council taxpayers and central government. The estimates of financing costs include current and future commitments based on the capital programme.

Gross Borrowing

Gross borrowing refers to the Authority's total external borrowing and other long term liabilities versus the Capital Financing Requirement.

Actual and Estimated Capital Expenditure

Actual and estimates of capital expenditure for the current and future years.

Capital Financing Requirement

The Capital Financing Requirement (CFR) represents capital expenditure financed by external debt and not by capital receipts, revenue contributions, capital grants or third party contributions at the time of spending. The CFR measures the Authority's underlying need to borrow externally for a capital purpose. The Authority has a treasury management strategy which accords with the CIPFA Code of Practice for Treasury Management in the Public Services.

Authorised Limit

In respect of its external debt, the Authority approves authorised limits for its total external debt gross of investments. These limits separately identify borrowing from other long-term liabilities such as finance leases. Authorised Limits are consistent with the Authority's current commitments, service plans, proposals for capital expenditure and associated financing, cash flow and accord with the approved Treasury Management Policy statement and practices. The Authorised Limit is based on the estimate of most likely prudent, but not necessarily the worst case scenario and provides sufficient additional headroom over and above the Operational Boundary.

Operational Boundary

The Operational Boundary for external debt is based on the same estimates as the authorised limit but reflects the Head of Finance's estimate of the most likely, prudent but not worst case scenario, without the additional headroom included within the authorised limit to allow for unusual cash movements, and equates to the maximum of external debt projected by this estimate. The operational boundary represents a key management tool for in-year monitoring. Within the operational boundary, figures for borrowing and other long-term liabilities are separately identified.

Limits on Interest Rate Exposure

This means that the Authority will manage fixed and variable interest rate exposure within the ranges. This provides flexibility to take advantage of any favourable movements in interest rates.
