Content

- The Story So Far...
- Theme Summaries – Content
- Selection Criteria
- Key Emerging Themes
- What Next?

Purpose of the JSNA

- To identify current & future health & wellbeing needs
- To establish a shared, evidence based consensus on key local priorities
- To form a key element in the Commissioning Cycle

The Story So Far....

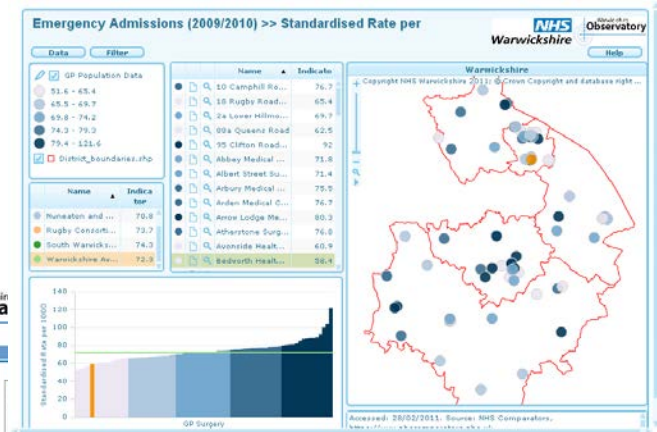

- Just the starting point!
 - Full annual review of existing work
 - Produced series of key message summaries
- More detailed needs assessment work required
 - Ongoing programme of work
 - Analysis of health, social care, demographic, socio-economic, housing data
 - But...more than just 'facts & figures'- complete evidence base
 - Will include broader range of qualitative information
 - Knowledge, pathway information, consultation activity with stakeholders, service users, professionals, etc.
- Purpose of the summaries – to provide a focus for JSNA and HWB Strategy

Theme Summaries - Content

- 1 page summary
- Headline data analysis
- Findings from consultation activity
- Links to outcomes sought
- Links to related strategies / further info
- ‘Who Needs to Know This’
- Reviewing current demand/performance/issues

Theme Summaries - Content

- Not just a look back!
- Part of a wider evolving process
 - Series of web-based tools
- JSNA as a vehicle
 - To move forward/model future need
 - To inform service commissioning strategies

Warwickshire JSNA

WELCOME TO THE WARWICKSHIRE JSNA BLOG!

Topic Summary

The 2010-11 Needs Assessment for Adult Alcohol Treatment Services in Warwickshire

This needs assessment identified a number of issues around the way in which alcohol related data is currently captured and recorded. It recommends that primary care and secondary emergency recording systems should capture alcohol related presentations to be more fully identified and data recording systems should be able to capture and report related offences to be recorded. Data gaps in secondary care alcohol screening and third sector/charity advice information were also highlighted.

Other findings recommendations included:

- All partners to consider what further work can be undertaken to highlight the groups associated with increased drinking in the wider population, and specific target groups within the population.
- Community safety partners to implement projects to tackle alcohol related crime and anti-social behaviour in the priority areas of...

Selection Criteria

Identification of themes in terms of:

- Resource gap
- Demand
- Volume
- Significant inequalities
 - By geography and/or population group

Warwickshire JSNA Theme Summaries - 2011

1. Children

- Educational Attainment
- Looked After Children

Children/Young People

2. Lifestyle & Reducing Inequalities

3. Vulnerable Communities

- Disability
- Safeguarding

4. Long-Term Conditions

5. Mental Wellbeing

6. Ageing

- Dementia
- Ageing & Frailty

General Population

Older People

1. Children - Educational Attainment

Current issue/challenge/trend

- Although Warwickshire above the national average
 - big geographic & population group variation
- Importance of education as the key socio-determinant of health & wellbeing.

What is the gap?

- 63% of children not on FSM achieve 5 A*-C including English & Maths compared with 30% of children on FSM.

What are we doing about it?

- Raise awareness in schools and support identified schools.
- Promote uptake of FSM to secure funding to tackle impact of social deprivation on attainment

1. Children - Looked After Children

Current issue/challenge/trend

- Numbers increased by one third over last three years.
- Huge inequality in attainment levels between LAC & all other children.
- Poor health outcomes
- Over-representation in the justice system

What is the gap?

- Educational attainment & health outcomes to match those of other children
- Sufficiency test
- Housing needs

What are we doing about it?

- Dartington Project
- Early intervention
- Capital support to foster homes

2. Lifestyle & Reducing Inequalities

Current issue/challenge/trend

- Levels of obesity, alcohol related hospital admissions, STIs, all rising.
- Smoking, whilst decreasing, still a key public health issue.
- Massive impact on demand for and cost of health & social care services.
- Housing

2. Lifestyle & Reducing Inequalities

Current issue/challenge/trend

- Latest data shows that the gap between the most & least deprived areas of the County is widening.
- 13 years variation in life expectancy at birth across the County.
- The health of our most disadvantaged in society should be our top priority (Marmot).

3. Vulnerable Communities - Disability

Current issue/challenge/trend

- Although prevalence rates are lower in Warwickshire than nationally, there are still significant numbers of people with a physical or learning disability.
- The complexity of future care provision for disabled people will grow & personalisation will offer much greater choice.
- 33% of adults with learning disabilities live in institutional care.

What is the gap?

- In Warwickshire, 33% of people with LD live in institutional care. Best in practice nationally has single figures.
- Six lives audit sets the standards

What are we doing about it?

- The market will need developing for personalisation.
- Development of supported living

3. Vulnerable Communities - Safeguarding

Current issue/challenge/trend

- 20% increase in number of adult referrals
- 14-16% increase in number of children's referrals
- Partial commitment from partners

What is the gap?

- Safeguarding is everyone's business

What are we doing about it?

- Strong children's safeguarding board
- Strengthening adult's safeguarding board
- New strategy & process this financial year

4. Long-Term Conditions

Current issue/challenge/trend

- An estimated 1 in 3 people in Warwickshire live with one or more long term conditions. In the over 75s, this rises to 2 in 3 people.
- WHO – leading cause of morbidity by 2020. ‘Invisible Epidemic’
- Variation in QoF delivery across County
- Acute hospital admission rates are lower with better QoF management

5. Mental Wellbeing

Current issue/challenge/trend

- Statistics are likely to underestimate the scale of both adults & children in Warwickshire with a mental illness.
- 53,221 (10.2%) people in Warwickshire provide unpaid care for a relative, friend or neighbour.
- ‘No Health without Mental Health’
- Schools feel unsupported with mental health & behaviour problems.
- ‘Programme Budgeting’ analysis indicates high levels of comparative spend without outcome benefit

6. Ageing - Dementia

Current issue/challenge/trend

- It is estimated that the number of older people with dementia in Warwickshire will double in next 20 years, to more than 13,000.
- Are services ready to cope with this future demand?
- Early diagnosis
- Lifestyle opportunities

6. Ageing - Ageing & Frailty

Current issue/challenge/trend

- Consequences of a rapidly ageing population - Increases in numbers with limiting long-term conditions, cases of cancer, emergency hospital admissions, dementia, etc.
- Additional pressures placed upon our services (particularly health & social care). Issue of quality of life experienced by our residents as their life expectancy increases.

What next?

- Emerging issues & themes will fundamentally underpin HWB Strategy
- JSNA Stakeholder Conference – early 2012
- Continued consultation & engagement
- Delivery of more comprehensive Needs Assessment Programme
- Embedding more consistent approaches to producing needs assessments
- Transparency of information/content
 - JSNA Website/Local Information System (LIS)
