- 4.1 As the new highway assets which are being created through these schemes will come on to the Council's balance sheet once completed, the costs incurred by the Council need to be treated as capital expenditure.
- 4.2 Section 278 schemes are fully funded by developer contributions which are ring-fenced for the schemes described in the sections above. There are no alternative uses for the contributions and the addition of these schemes will not affect the overall level of available capital resources.
- 4.3 The respective Developers have already committed to funding the technical review work by accepting the Council's fee estimates. The Council's fees for technical review are always collected in advance of the s278 agreement being signed.
- 4.4 Procurement and subsequent award of construction contracts will only take place subject to the applicable Section 278 agreements being signed, which will provide 100% of the funding. The commencement of the works is dependent on the completion of the technical review, procurement and contractor mobilisation processes. Any slippage or increase in costs due to changes in the scope of the works will be reported in the normal quarterly monitoring process.

5. Environmental implications

- 5.1 The environmental impacts of developer-funded highway schemes are considered through the planning approval process.
- 5.2 The contractors on the Council's Framework Contract for the Provision of Engineering and Construction Works (WCC 6012) have all demonstrated that they hold a certificate of compliance with BS EN ISO 140001 (or equivalent) or have otherwise satisfactorily demonstrated their policies and arrangements for the management of construction-related environmental issues.
