

Warwickshire County Council

STATEMENT OF ACCOUNTS 2021-2022

Warwickshire County Council

Statement of Accounts

Section A: Narrative Statement

Section B: Statement of Accounts

Section C: Warwickshire County Council Annual Governance Statement

Section D: Warwickshire Pension Fund Statement of Accounts

Introduction

I am pleased to introduce our Financial Accounts for 2021/22. The purpose of these accounts is to present a true and fair view of the financial results of our activities for the year and the value of our assets and liabilities at the end of the year.

This narrative report is set out in five parts. The first provides some key information on what the Council does, how it does it and its plans for the future. The second part provides further detail on how we plan to resource the Council's activities. This section also considers the factors in the external environment that influence our decisions and highlights some of the key risks that we have identified to the delivery of our priorities. The third part summarises our financial and other performance in 2021/22 and our effectiveness in the use of our resources, while the fourth part describes our outlook moving forward into the new financial year. It includes some of the key pressures facing the Council over the next few years and the changes taking place in the Council to respond to those challenges. Finally, this report explains how the

Financial Accounts for 2021/22 are prepared and set out.

The Covid-19 Pandemic has continued to have profound impacts, globally and locally, for public health, the economy, society and the environment. The County Council rose to the challenge of delivering a range of new services at short notice and provide existing services in different ways whilst reducing income generation opportunities and causing delays in the delivery of some of our key revenue and capital projects. Alongside responding to the immediate challenge presented by the Pandemic we have completed the delivery of our recovery strategy and developed a new Council Plan for the next 5 years to ensure the Council, residents and Warwickshire as a whole emerges from the Pandemic stronger than ever. Our efforts were supported by additional Government funding allowing us to continue this crucial work beyond the end the current financial year. The result is a highly unusual financial year with the impact of Covid visible throughout our financial statements.

Rob Powell
Strategic Director for Resources

Organisational overview

In February 2022 our new Council Plan was approved. The purpose of the Council Plan is to set out the top-level strategic direction of the Council and to articulate the Council's vision and ambition for Warwickshire. The Council Plan provides the necessary framework to deliver on

our ambitions, through change management and innovation, and ensures there is a clear line of sight on delivery of the Council's core purpose and outcomes. Our ambition remains to make Warwickshire the best it can be, sustainable now and for future generations.

Our ambition for Warwickshire

Three strategic priorities

We want Warwickshire to have a **thriving economy and places** that have the right jobs, skills, education, and infrastructure.

We want to be a County where all **people can live their best lives**; where communities and individuals are supported to live safely, healthily, happily and independently.

We want to be a **County with a sustainable future** which means adapting to and mitigating climate change and meeting net zero commitments, so that our generation ensures future generations can live well and reap the benefits of a sustainable and thriving Warwickshire.

Seven areas of focus

Create vibrant places with safe and inclusive communities

Deliver major infrastructure, digital connectivity and improved transport options

Promote inclusive, sustainable economic growth, successful business, good quality jobs and future skills

Tackle climate change, promote biodiversity and deliver on our commitment to Net Zero

Deliver our Child Friendly Warwickshire strategy - Happy, healthy, safe children

Through education, improve life opportunities for children, young people and those with special educational needs and disabilities

Support people to live healthy, happy, and independent lives and work with partners to reduce health inequalities

To make this happen, we will be a great Council and partner: One which harnesses community power, uses data and digital solutions to improve service efficiency and is a great organisation to work in with outstanding leadership and a talented agile workforce.

The approach to developing the new Council Plan this year was fully integrated and can be described as - One Council, One Plan, One Budget. The Council Plan communicates our priorities over the next 5 years. It seeks simplicity within the complexity, breadth and inter-dependence of the Council's strategic role and service delivery, while ensuring sufficient flexibility to respond to rapidly changing, volatile and often ambiguous external conditions. Our Budget and Medium-Term Financial Strategy (MTFS) will translate the direction set out in the Council Plan into a sustainable financial strategy. This helps us to plan ahead, so we are able to meet our spending requirements, taking into account Government grants, Business Rates and Council Tax income. The financial strategy helps us to ensure our financial resilience and medium-term financial sustainability, so we can continue to provide high quality services to our residents.

There are a number of key themes to the strategy, setting out our areas of focus:

- The strong foundations through delivery against the Covid-19 Recovery Plan and our transformation programme, as reported to Cabinet in December 2021, and a continuation of work we have started;
- Early thinking and commitment to work with partners to develop a clear policy approach to the levelling up agenda;
- Joining up, connecting, and working as One Council to focus our collective efforts and maximise their impact for communities and residents;
- Building on our work on Community Powered Warwickshire and work done including our Social Investment and Green Shoots funds, Shielding hubs, Food Forum, Community testing etc.;
- A sharper focus on prioritisation to balance rapidly increasing demand with available resource and funding, and to optimise the

Council's impact on our communities and residents; and

- Our commitment to working with partners and communities to identify solutions to the challenges we face; to build on existing strengths and successes and to learn and improve from our experiences.

We use reserves to manage financial risk and promote financial sustainability. Any reserves not needed to manage financial risk are used for time-limited investment to support the delivery of the Council's ambitions, to deliver savings and to reduce demand in future years.

The medium-term financial strategy will require regular reviews in order to remain dynamic, robust, ambitious and deliverable, and will be updated at least annually.

Politically, Warwickshire County Council has 57 councillors, who are elected every four years. The last elections were held on 6 May 2021. The current political composition of the Council is 42 Conservative members, 6 Labour members, 5 Liberal Democrat members, 3 Green Party members and one Independent. The Council makes its decisions via a Cabinet of nine members (in 2021/22) including the Leader of the Council, Cllr Izzi Seccombe OBE. Warwickshire's Councillors are responsible for setting the strategic direction of the Council and for scrutinising performance. Further details of the governance arrangements in the Council are included in the Annual Governance Statement, included within this document.

Organisationally, in 2021/22 Warwickshire operated through three Directorates: Communities (including Fire and Rescue and Education), People (including Public Health) and Resources. Each Directorate is headed by a Strategic Director who sits on the Council's Corporate Board along with the Chief Executive. Services within each Directorate have plans in place which correspond to the budget set for them by Council and the key

outcomes within the Council Plan. Each service has Key Performance Indicators which are monitored and included in quarterly performance reports to Directorate Leadership Teams and Members.

At the end of the year we had the equivalent of 4,156 full-time employees and just under a third of our spending each year is on staffing. This is an increase of 120 full-time employees from last year as planned organisational change and Pandemic response has resulted in a strengthening of our teams in several areas. Warwickshire's employees are responsible for translating Councillors' strategic decisions into actions. Our Workforce Strategy sets out the key principles to ensure we have a workforce that is fit for purpose to deliver the Council Plan.

The Council collaborates with a number of external partner organisations to plan and deliver its intended outcomes. These include the neighbouring councils of Coventry City Council, Solihull Metropolitan Borough Council, and the five Warwickshire District and Borough Councils.

We are a non-constituent member of the West Midlands Combined Authority and a member of the Coventry and Warwickshire Local Enterprise Partnership. We work closely with local NHS organisations, particularly through the Health and Wellbeing Board and the Coventry and Warwickshire Integrated Care System. We also work with a number of other bodies, including:

- Central Government departments and ministries;
- National and local voluntary and community sector organisations, and charities;
- Academy schools and academy trusts in Warwickshire;
- Local universities and other academic organisations;
- Local industry and businesses; and
- Town and parish councils in Warwickshire.

Further details of the Council's key priorities, plans and outcomes are available in the Council Plan.

Resourcing our activities

The medium-term financial strategy underpins the delivery of the Council Plan and is agreed as part of the budget-setting process which concludes in February each year. Taking a medium-term approach allows for a more coordinated and planned approach to

prioritisation and allows services to focus on delivery knowing the financial limits and constraints within which they are required to operate. Within the budget resolutions, the Council confirms and applies a number of fundamental financial strategies and policies.

Revenue and capital spending

We spend our resources in two ways, through revenue and capital spending. Broadly, our revenue spending relates to income received in year and spending on items used in the year. Most of our salary costs are included in revenue expenditure. Our capital spending relates to items we have bought, created, or improved and which will be used for more than one year. An annualised amount is charged to our revenue accounts to reflect the economic use of assets each year to provide services. This accounting charge does not reduce our revenue resources

but borrowing to fund our capital expenditure does.

Revenue allocations are made to services through a process which balances demand forecasts, inflation and other price increases, commitment to our statutory duties and the investment choices which the Council wishes to make to improve services or reduce costs. By law, we must set a balanced budget which ensures that the Council meets not only its existing commitments but also remains on a firm footing for the future.

Revenue Resources	2021/22	2022/23
Original gross budget at start of year	£m	£m
Business Rates	67.7	73.6
Council Tax	293.0	305.2
Total Unconditional Revenue Resources (Gross)	360.7	378.8
Specific Government Grants	84.3	115.0
Adult Social Care Levy	30.7	38.0
Customer and Client Receipts	131.2	107.8
Dedicated Schools Grant	246.3	249.1
Total Revenue Resources	853.2	888.7

Adult Social Care is the third largest area of revenue spending after schools and Children and Education. Each year since 2016-17 the Government has permitted local authorities to levy an additional amount on top of their normal council tax increase each year, with this additional funding to be ring-fenced for use in adult social care. We have taken the additional levy (2% for each year between 2016/17 and 2020/21 as well as for 2022/23, and 1% in 2021/22) and have increased the resources available to deliver adult social care by at least the amount raised this way.

The figures shown above for specific Government grants include a number of grants which come with conditions that limit our

discretion in how they can be used. The largest of these is the Dedicated Schools Grant which we receive from Government to meet the cost of funding schools and relevant pupil-related services; this is presented separately in the table above. We are continuously reviewing how we deploy these resources for maximum strategic effectiveness.

Our capital spending power is the combination of external income which must be spent on capital (such as specific grants or contributions and the receipts from the sale of our assets) and the extent to which the Council is willing to meet the costs associated with borrowing money from its revenue resources.

Capital Resources	2021/22	2022/23	2023/24 and later
Budget for the year after adjusting for previous year's outturn	£m	£m	£m
Capital Grants and Contributions	148.8	90.7	109.1
Receipts from the Sale of Assets	29.2	9.0	125.3
Direct Application of Revenue Resources	1.3	0.5	0.1
Borrowing (to be repaid from revenue resources)	39.9	74.9	216.1
Total Capital Resources	219.2	175.1	450.6

(Note: the 2022/23 and later years' figures will be updated before the accounts are finalised to reflect the rephasing of the capital programme as a result of the 2021/22 end of year position)

Our capital allocations are made in line with our Capital Strategy, which includes three key elements: capital maintenance works to ensure our assets continue to be fit for purpose and able to support the provision of services;

replacement of assets that have reached the end of their useful life and capital investment to create and develop new assets. Each element has a number of strands that ensure a clear focus on the purpose of capital spending and

the prioritisation of proposals, underpinned by specific service asset management strategies.

Allocations included in the maintenance programme meet one of the following three criteria:

- Maintaining our assets to ensure services can continue to be delivered;
- Statutory health and safety and other regulatory requirements; and
- Annual equipment and/or vehicle replacement programmes.

Our annual maintenance programme includes allocations from the Government grants received for schools and highways maintenance plus revenue funding used for the replacement of vehicles, where this is more cost effective than leasing the vehicle. We also finance some maintenance from borrowing.

For 2022/23 a new Asset Replacement Fund has been created to alleviate pressure on service revenue budgets accumulating underspends to fund costs of replacing vehicles, plant and equipment and to avoid the depletion of capital resources set aside for investment. This will be funded from corporate borrowing.

Savings and efficiencies

The resource estimates shown above reflect the impact of Pandemic and the broader economic outlook. The Council has a strong track record of delivering savings which has served us well this year through some challenging financial times. The Council Plan and the Medium-Term Financial Strategy aim to further this success, maintaining strategies of investment for longer term savings and, as far as possible in an

Investment schemes are, by their nature, not routine and so are only considered if they move the organisation towards the delivery of our outcomes or are invest-to-save schemes. Where we have discretion in how to apply capital financing, we use a structured evaluation process that assesses:

- What we are trying to achieve for the Warwickshire residents, businesses and visitors by investing in particular assets;
- The contribution of the new assets to the delivery of corporate outcomes;
- The financial costs and benefits over the short, medium and long-term;
- The risks inherent in the delivery of the scheme itself and the expected benefits, with a focus on better up-front planning and timetabling; and
- The contribution the new asset can make to addressing the Climate Change Emergency.

Investment schemes may be funded by any of the sources in the above table, and often a combination of these.

environment of high and rising inflation, prioritising finding new ways of working rather than service reductions. The key themes are better procurement, improvements in efficiency, increased income and delivering reductions in demand. The Medium-Term Financial Strategy tasks the authority with finding £65.7m of savings over the next 5 years.

Reserves

Reserves are resources we have accumulated over time and set aside for a particular purpose as part of an integrated approach to the effective financial management of the authority over the short, medium and long-term.

We hold reserves to:

- Ensure future events outside of our control do not undermine the authority's overall financial position or impact on service delivery;
- Plan for the effective use of resources over time for a specific purpose;
- Ensure we meet funding conditions (set either by an external funding body or a specific decision of Members) in our use of any available resources; and
- Retain any other accumulated underspends prior to decisions on their use.

Our budget is set to include anticipated levels of reserves added or drawn down in the year; these plans may change as the year progresses to react to emerging pressures or other events and are approved in our quarterly monitoring process. Some reserves are held at a corporate level to support overarching risks and strategies.

The level of general reserves is consistent with the overall financial environment and the key financial risks faced by the Council. These risks are assessed at least annually and take account of circumstances at the time of assessment as well as trends into the future.

The Medium-Term Financial Strategy includes the planned use of £41.1m of the Available-for-Use reserve.

Reserves Balances at start of year	2021/22 £m	2022/23 £m
Management of Risk	18.8	15.6
Available to Use Reserve	42.0	48.8
Earmarked Reserves	70.7	83.3
General Reserves	21.4	26.0
Specific Investment (including Covid funding)	70.2	47.7
Schools	21.3	23.1
Total Reserves	244.4	244.5

Borrowing and investments

We undertake treasury management activities in a prudent and flexible manner so as to ensure we retain sufficient liquid funds to provide for day-to-day cashflow requirements whilst funding our capital spend at the lowest cost. These activities are managed within an overall

framework determined by the Treasury Management Strategy which is updated and approved by Members annually. Interest income and expenditure as a result of investments or borrowing is reflected in our revenue budgets.

Pensions

The majority of the Council's employees (excluding schools) are members of the Warwickshire Local Government Pension Scheme, and the Council administers the fund that supports the Scheme. As a defined benefit scheme, the Scheme is shown as a long-term liability in our accounts. However, statutory arrangements for funding this deficit are in place, including increased contributions over the working life of employees, and means that our financial position remains healthy.

Both the accounts for the County Council and the Pension Fund are included in this document, though they are operated as independent entities. The County Council's accounts reflect the pension disclosures relating only to its own employees. This includes disclosures for those staff with alternative pension schemes, such as Teachers and Firefighters.

Management of Risk

The successful delivery of the Council Plan and our sustainability into the future are dependent on our ability to manage and respond to the risks we face. Many potential issues will remain on the strategic risk register and be regularly

monitored, while others are actively managed to reduce the risk or its impact. Further information can be found in the Annual Governance Statement section within this document.

Our performance in 2021/22

£4 million
of external funding
secured by Economy
and Skills Team.

61%
of people open
to Adult Social Care
over the age of 80
receiving care at home.

Received approximately
660,000 visits to our
recycling centres.

There has been a **21% increase**
in e-books and audio loans.

Our Registration Service
conducted **2880** marriage
ceremonies and delivered **772**
citizenship ceremonies online.

Delivered road safety
education sessions to
98,000 people.

87%
of planning applications
determined as County Planning
Authority within their statutory
time period.

98%
of Warwickshire
broadband coverage.

76%
of Warwickshire all
pupils achieved grades
4 or above in English and
mathematics GCSEs.

Over the last year we have continued to respond to the changing demands of the COVID-19 Pandemic, following Government guidelines and advice. As the national focus moved towards learning to live with COVID-19, locally our Recovery Plan which identifies our priorities and aids us to get back to a more normal state was implemented, following final Cabinet approval in September 2020. Our key principles have shaped our response this year:

- Target recovery activity and support to where most needed through evidence-based decisions and focusing on priority outcomes and agreed priorities.
- Stabilise and accelerate the recovery for Warwickshire's people, places, and businesses, including the recovery of Council Tax and Business Rates;
- Tackle inequalities - helping our most vulnerable and disadvantaged citizens and communities overcome the negative impacts of COVID-19;
- Join up and work in Partnership - maximise connections with partners (public services, private sector, communities, voluntary sector, and citizens) to speed up recovery;
- Focus on long-term environmental challenges - use recovery efforts to accelerate Warwickshire's climate change ambitions; and
- Apply our learning from COVID-19 - utilise learning and good practice to improve the Council as an organisation, deepen collaboration and partnership working, and strengthen place and systems-based working across Warwickshire.

The full COVID-19 Recovery Plan comprises 10 recovery priorities and the key achievements are summarised below.

Priority 1 - Contain the virus and promote physical and mental health and well-being: Promote the health and wellbeing of our communities, contain the spread of COVID-19 locally and target action to protect our most vulnerable residents and communities.

Across the last year there are numerous key achievements in this priority area. Our outbreak

control plan continues to be utilised as and when required. Encouragingly, over the course of the Pandemic, the overall number of COVID-19 cases and death rates in Warwickshire per 100,000 population is lower than both the national and regional figure. The County Council's contact tracing team has taken over the role of National Test and Trace contacting up to 4,000 residents a week and operating 7 days a week, receiving positive feedback from the Department of Health and Social Care. Our lateral flow testing (LFT) operation, built in December 2020 to provide asymptomatic COVID-19 testing from 6 static testing sites and a mobile offer, was slimmed down, and refocused from July 2021 onto 'disproportionately impacted groups'. A Warwickshire wide COVID-19 vaccination programme was implemented at speed in line with Government requirements, alongside a programme of Flu vaccinations in the winter period resulting in an overall increase in vaccination uptake.

Ongoing preventative initiatives such as Wellbeing for Life and Fitter Futures continue to reduce pressures on NHS services. Our Health and Wellbeing Strategy was published and highlights our vision for improving the Health and Wellbeing of our citizens, supporting our local economy and our staff. Our Well-being for Life "Plan on a Page" has been finalised covering the promotion of 5 ways to well-being, work-place well-being (Thrive at work), obesity and mental health.

A £1m Social Investment Fund was launched to enable targeted interventions to support Warwickshire's communities and enable community-based support for those disproportionately impacted by COVID-19 such as extending or introducing specialist support; or providing additional community-based support.

Priority 2 - Maintain resilient and sustainable services: Manage increased demand for service.

Key achievements supporting this priority for include the commissioning of new mental health and wellbeing support services for adults strengthening our support offer to local residents.

We continue to support the care market, taking a mutual aid approach, to respond to infection, prevention, and control; testing; vaccination; recruitment and retention as well as financial pressures. We passported national funds quickly and maintained our temporary payment terms. A recent peer review of Adult Social Care including our start with strengths approach was highlighted as good practice and enables us to manage our demand and sustain positive achievements as a result of our adult transformation programme. We have successfully leveraged our voluntary sector opportunities to support our health and care services through community engagement.

Last year Her Majesty's Inspectorate of Constabulary and Fire & Rescue Services (HMICFRS) inspected the Warwickshire Fire and Rescue Service (WFRS) and its response to the Pandemic, reporting their findings that WFRS had maintained its statutory functions and made good use of its staff to carry out additional duties to support the community during the Pandemic. The demand for our virtual library services continues to rise with on average, approx. 20,000 eAudio and eBook titles are now downloaded, approx. 50,000 eNewspaper issues are read and approx. 70,000 searches every month.

Priority 3 - Help our children and young people catch up on their education: By returning to learning, improving access to digital resources, and tackling attainment gaps.

Key achievements for this priority include continuing to support and advise early years settings, schools and colleges with their COVID-

19 response, recovery, and resilience plans. Despite continued disruption across recent academic years pupil attendance remains high with an overall rate being in line with National and West Midlands rates.

The Department for Education published attainment data for last year shows that Warwickshire continues to perform strongly in GCSE results when compared nationally, regionally and with our statistical neighbours. This trend is also apparent for Warwickshire pupils who have a statement of Special Educational Needs (SEN). However, disadvantaged Warwickshire pupils do not perform so well against benchmarks and addressing this remains a key focus.

All education providers have been given the chance to bid for post-16 transition funding and future careers funding to support the engagement with skills and training programmes. Further progress was made on the delivery of our Special Educational Needs & Disabilities (SEND) Change and Inclusion transformation programme incorporating the outcomes of the recent Ofsted local area inspection. Career advice to vulnerable and disadvantaged young people including apprenticeships and supported internships has increased and is continuing.

Our new Children's and Young People strategy was approved, and our Child Friendly Warwickshire programme launched.

Priority 4 – Harness the power of our communities to tackle inequality and social exclusion: Champion equality and tackle the effects of poverty, vulnerability, isolation, loneliness, and domestic violence: and support this by promoting increased and sustainable social action, volunteering, and community capacity.

A £1m Social Impact Fund was launched supporting voluntary, community, and social enterprises to address inequalities in areas most affected by COVID-19. The Local Welfare Scheme continues to help our most vulnerable

residents, helping cover the cost of food, energy, water bills and other essentials. Since December 2020, successfully distributing its £1.89m allocation of DWP's COVID-19 Winter Grant Scheme, £1.63m COVID-19 Local Support Grant and £3.47m Household Support Fund, achieving high redemption and take up rates. By working with the Citizens Advice network, we are ensuring there is appropriate specialist debt provision across the county, focusing on financial difficulties that have arisen as a result of COVID-19. Our Warwickshire Food Forum co-ordinates county wide work to tackle food poverty including the establishment of a food strategy to understand priorities and gaps in provision, food banks, and the development of three community supermarket pilots. We proactively supported those families eligible for benefits related free school meals with the cost of food for their children over all the school holiday periods. This cohort of children has been supported throughout the Pandemic through the Local Welfare Scheme, School Holiday Support Scheme or more recently in 2021/22 through automatic vouchers via grant funding through the Household Support Fund. We have launched a £1.3m COVID-19 Mental Wellbeing and Resilience Programme with four strands. Our COVID-19 Mental Wellbeing Resilience Fund funded thirty-six successful bids and awarded £177k to support 100 schools to develop their mental wellbeing curriculum.

In addition, we are developing a loneliness and social isolation awareness raising campaign, which will include training for Council staff to better identify people who are experiencing loneliness, signposting them to the support they need.

Working with our delivery partner, New Local, we are progressing an ambitious Community Powered Warwickshire programme, underpinning the Council Plan and we continue to establish voluntary and community programmes to build on the achievements of the COVID-19 response effort.

The Warwickshire Community And Voluntary Action (WCAVA) is developing an action plan for

volunteers for carers and are engaging carer organisations to understand both their short and long-term needs and an employment pathway into Volunteering placements is being explored; we are also developing a service offer specification for our support to the voluntary and community sector; WCAVA continue to work with the Carers Trust, the Trust Partnership, and Warwick Young Carers, to develop volunteer roles and bring volunteers into these organisations; we are attempting to measure the social value of volunteering to be able to highlight the benefit to the community; a participation and engagement framework is being developed, establishing a residents' panel and developing our wider approach to consultation with local residents to better inform and test our policy and performance; six programmes are now in delivery with the aim of reducing loneliness and isolation and we have developed a framework with Coventry University to evaluate their impact; the commissioning of a domestic abuse support and accommodation service has been concluded with Refuge now delivering the service from 2021 to 2026 and a Tackling Social Inequalities Strategy has been developed and delivery on this programme of work is now underway.

Our Councillor Grant programme, which provides each of Warwickshire's County Councillors a fund of £6k to invest in small-scale projects that will make a difference to their areas, received 259 applications for support.

Priority 5 – Support business and grow the economy: Build confidence in local businesses. Re-purpose town centres and create the conditions for business innovation and investment to drive economic growth.

Our key achievements in this priority include continuing proactive work with our key partners, including the Chamber of Commerce, Federation of Small Businesses, Coventry and Warwickshire Local Enterprise Partnership and Growth Hub, Coventry City Council, and the District & Borough Councils to co-ordinate our

support measures to ensure a rapid and coherent response to support our economy.

In addition to the support provided by Government, we developed an economic recovery package, which includes a range of support measures providing locally tailored help to our businesses and economy. Our Survive, Sustain, Grow programme offers supported 600 businesses with bespoke advice and support to review and refocus their business plan to adjust to the Pandemic and explore new growth opportunities. Digital training for retail businesses provided specialist support to retailers to help them both create and maximise their on-line presence. The Adapt & Diversify scheme, allocated £1.5m of small grants to 120 businesses to help them invest in new activity that would enable them to exploit new growth opportunities. Our employee well-being support programme was extended to small businesses across the county to provide help and advice to employees who may be struggling, receiving positive feedback.

We supported our struggling tourism economy with a marketing and promotion campaign for Warwickshire engaging national press and media outlets, reaching an audience of around 47m people, actively engaging over 50,000 people in campaigns and competitions. Other targeted work supports local economies during the Pandemic and focusses on future growth opportunities, including the Tech Challenge which is a competitive fund challenging our local digital creative sector to develop innovative new approaches to support our town centres recover from the Pandemic through new digital platforms that town centres and local businesses can utilise.

The Art Challenge uses the Getting Building Fund in a programme working with local artists and creatives to develop 8 art installations in 2022 across our town centres to creating new focal points. The fund was also used to provide investment to develop new employment space for the digital creative and gaming sector in Leamington Spa, providing additional space to support a priority sector which experienced

strong growth during the Pandemic. Our Warwickshire Future Places work with the Institute of Place Management is a series of interactive workshops and learning sessions with partners, stakeholders, and representatives of our town centres to explore future drivers of change and opportunities, providing a toolkit to help local areas develop recovery and growth plans for their towns.

Priority 6 – Stimulate job creation and skills: Work with our partners in the Local Enterprise Partnership and higher and further education, to invest in getting people back into employment, or starting their careers, supporting skills, training, and re-learning.

Key achievements for this priority included early preparation for the end of the Government's Furlough scheme by creating a service to provide redundancy support for employers. A digital careers offer was developed providing video content showcasing a range of different sectors, career, and training opportunities available. Grant funding supported schools to adapt their careers offer in light of restrictions preventing work experience in workplaces, and a transition fund enabling further education and training providers to undertake activities and induction programmes over the summer for school leavers. Warwickshire Skills Hub launched in September 2021 supports residents make the most of their employability through upskilling and / re-skilling.

Our Fair Chance Employer Programme supports businesses to become more inclusive and provide opportunities for key priority groups including care leavers, older workers, and those with special educational needs and disabilities (SEND). We are continuing the Apprenticeship Progression Programme which experiences a steady flow of applications. New training programmes such as the Government's "Restart Scheme" is supporting us to meet many emerging skills gaps.

There has been an 80% increase in employer enquiries wanting to offer training and work

opportunities as they build back their workforce. Adult Community Learning has been reviewed to take account of the changing requirements as a result of COVID-19.

Priority 7 – Invest in regeneration and a sustainable future: Invest in the regeneration of local areas, support housing growth, a fit for the future digital infrastructure and sustainable transport.

Key achievements supporting this priority includes the commencement of the £140m Warwickshire Recovery and Investment Fund which will stimulate the County’s economy, create up to 3,400 jobs, support local businesses and bring investment into the County over the next 5 years. It is anticipated leverage of up to £104m from the private sector, up to £35m from the public sector and provide an annual regional Gross Value Added of up to £160m.

We have established our own property company, the Warwickshire Property and Development Group (WPDG), to support area regeneration and make the most of our land assets. The company’s business plan forecasts delivery of 2,200 units of housing, alongside developments in the industrial, tourism and retail markets. We continue to work in

partnership with the District & Borough Councils and Homes England to deliver the housing needs of Warwickshire and support the recovery of our local economy developing a priority worker help to buy scheme as an option, where appropriate, for new builds developed by the WPDG.

An ambitious programme of cycling infrastructure schemes is delivering 29 km of new or upgraded cycling infrastructure. Active travel is promoted through road safety education and support to schools, businesses, partners, and communities to develop sustainable travel plans. We are utilising funding secured from the Office for Zero Emission Vehicles and the Getting Building Fund by installing 90 twin headed charge points across the county, predominantly in District & Borough off-street car parks, with some located on-street in our town centres and smaller market towns. We have secured funding for the roll out of fibre broadband for Warwickshire, and proactively support the roll out of 4G and 5G mobile phone connectivity. Evidence from Mobile Network operators continues to show progress against the upgrade to masts, providing improved 4G in rural areas and 5G delivery in more urban areas including Warwick, Nuneaton, Leamington, Kenilworth, Stratford and Atherstone.

The Customer Service Centre answered **234105 calls** over the year and we are proud that customer satisfaction levels have remained high with an average of **89.4%**

24929 community safety contacts by Warwickshire Fire and Rescue Service.

Recovered energy from over **77%** of our residual waste.

89%

of Warwickshire pupils attended schools (including nursery schools) judged Good or Outstanding by Ofsted.

Our business support programmes have helped clients raise over **£3m** of investment.

3645 incidents were attended by Warwickshire Fire and Rescue Service.

Heritage and Cultural Services have seen a **5.01% increase** in uptake in services through digital channels.

Priority 8 – Climate Change: Make sustainability and tackling climate change central to our recovery so that we lay the foundations for a sustainable long-term future.

Key achievements this year include sustained reductions in carbon emissions in 2021/22 where 7,822 tonnes, a reduction of 31% compared to pre-Pandemic levels of 11,395 tonnes, comprising;

- 31% reduction in total; and
- 58% reduction in staff business travel emissions.

A Climate Change Impact Assessment has been completed identifying areas and services most at risk of future extreme weather, vulnerabilities, mitigation, and priority actions. Residents and local businesses benefitted from the introduction of a collective Green Energy purchasing scheme and residents were able to take advantage of cheaper energy suppliers through our “Switch and Save” scheme. Energy reduction plans in Council buildings have been developed and are being implemented.

We supported delivery of a Coventry and Warwickshire COP26 conference in March 2022 with key partners in the spring involving key public, private and voluntary sector partners across the sub-region sharing good practice, aligning plans and jointly committing to collaboration on decarbonising the sub-region.

We implemented the first Local Government Biodiversity Net Gain in the UK requiring developers to deliver a wider range of environmental benefits over and above the full environmental impact of the proposed development e.g., air quality, flood risk management.

Our innovative “Green Shoots” community climate change programme is underway with local organisations bidding for support for green initiatives. 110 applications to a total of £1.3m has been received, and £625k for 69 schemes awarded. The scheme was featured as a Local Government Association (LGA) case study and was showcased at COP26 in Glasgow. We have

also funded an additional 4 projects to the value of £10,000 for implementation by schools following a Young Green Shoots initiative.

The Road Safety team has been working with 80 Warwickshire Schools as part of the Safe and Active Travel Awards programme which combines road safety, environmental benefits, sustainable travel and health activities. Work is also ongoing on the Safe and Active Travel scheme with workplaces and the wider community.

We have been awarded a grant to develop a plan for net zero heating in several Council premises. We have developed an ambitious estates rationalisation plan helping to reduce the office footprint.

The rural tree planting scheme will contribute to Warwickshire’s commitment to plant one tree for every resident, working closely with our District and Borough colleagues, with over 1,800 trees being planted in 2021 and to be recorded on the West Midlands Virtual Forest. The Council’s tenants have been supported to plant over 1,000 trees on the County Council’s farms as part of a 2-year Local Authority Treescape Fund grant.

Priority 9 – Develop our people and future ways of working: Invest in a sustainable and resilient workforce through recovery, learning from COVID-19 to embed flexible working, promote well-being and develop new ways of working.

Key achievements supporting this priority include developing our Employer Brand, which focuses on the powerful impact our people can have on others through their work and comprises of 3 'pillars': working with passion and purpose; explore and further your career; and improving at every opportunity.

We continue to strengthen our focus on Equality, Diversity, and Inclusion (EDI) by revamping the council EDI group and growing our staff networks to engage with staff on a range of issues. Our pay gap information is positive and favourable compared to the national picture and our staff surveys indicate

that 83% of staff agree that the Council values equality and diversity in the workplace.

Our agile working programme has been implemented to enable work to be “what you do and not ,when and where you do it”, building a sustainable and resilient workforce.

A staff engagement strategy has been developed to build on our “staff check-in” approach implemented during COVID-19, with our staff engagement index increasing from 70% to 74% compared to a benchmark average of 57% and the Local Government benchmark of 54%.

We have achieved bronze Thrive at Work accreditation and are working towards the Silver accreditation, while our sustainable and resilient workforce project has been implemented to support the well-being of our staff achieving a reduction in sickness absence from 10.9 days per FTE, to 8.50 days in December 2021. Our Estates Masterplan programme is being developed to reflect our ongoing needs across the Council and reduce our carbon footprint and we have developed our building re-instatement plan to ensure our buildings are COVID-19 safe and to support hybrid working through digital technology.

Priority 10 – Deliver high performance by harnessing digital, data and making the most effective use of our resources: Use data and technology solutions to drive investments and high performance; and develop a new framework to measure performance, investments, and financial management.

Our key achievements this year for this priority include progressing our plan to digitise our records and remove our reliance on paper across our operations with over 4,900 boxes and circa 29,000 files submitted through our records storage process. We are also continuing to develop our Microsoft functionality and to create a common approach to records storage. We are working to ensure our strategy is evidence-led with improvements including data providing real-time reporting and performance

information. Our customer service standards underwent a full review during the COVID-19 recovery period, and despite the changing working practices and increased demand on our customer-facing services, we continue to comply with the standards and demonstrate many areas of good practice.

Our Council Plan and Performance Management Framework have been refreshed and incorporate the continuing work to recover from the ongoing and longer-term impacts of the Pandemic alongside our usual Service offer.

We have also been successful in receiving awards across the year:

- Warwickshire County Council’s Legal Services team have been recognised and celebrated for their outstanding achievements in contributing to the local community, winning two awards at this year’s national Lawyers in Local Government Awards. Warwickshire Legal Services were named Governance Team of the Year and one of the team members was awarded the title of Legal Professional of the Year at the sixth annual awards ceremony, celebrating the most dedicated and engaged professionals across local government legal practice.
- We retained our LEXEL accreditation which is a legal practice quality mark for client care, compliance, and practice management. It sets the standard for client care; risk management; people management; structure and strategy; financial management; information management as well as file and case management.
- We retained or ISO14001 accreditation
- We won the Young Authority of the Year 2022 and first full-time roles secured for the 1st cohort of the National Graduate Development programme.
- 2 of our National Trainees were awarded Highly Commended at the awards too.
- The Association for Public Service Excellence Award was achieved for collaborative working across

Community Safety & regulatory services in regard to our response to Covid-19

We have benefitted from a number of Service inspections this year including Children's Services, Ofsted has now published its report on and stated that Warwickshire is 'good'. We are all delighted by the report having previously been marked as 'requires improvement' during the last inspection in May 2017. The latest inspection, published in a report on 1 February 2022, found that children and families in Warwickshire benefit from consistently good quality services at an early stage, making a real difference to their lives. Ofsted found that WCC social workers listen carefully to children and make sure that children's views inform decision-

making. Our social workers were found to be building stronger, more trusting relationships with families, giving parents confidence to develop their parenting skills.

The outcome of the latest HMICFRS inspection for Warwickshire Fire and Rescue Service was published in January 2022 and we were judged as "needing improvement" overall. A detailed action plan has been developed and implemented to address the areas found to be needing improvement.

Our LGA Peer Challenge was conducted in March 2022. The full report was published in April highlighting the impact of our transformation programme and endorsing our plans for the future.

Financial performance

Revenue income and expenditure

Our total revenue income from all sources in 2021/22 was £923.6 million, £70.4m higher than the gross income budget at the beginning of the year. The increase is attributable to higher than anticipated government grants (largely relating to Covid-19 and offset by the cost of services provided) and an increase in receipts from customers for services provided.

Revenue Income

Grants	£404.7m
Council tax (inc. Adult Social Care Levy and deficit from previous years)	£322.2m
Customer and Client Receipts	£136.4m
Business rates	£60.3m

We have spent £712.1 million of this revenue income to finance the various services we provide (excluding schools). Adding on schools spending (£211.4 million) and technical adjustments makes up the gross expenditure shown in our Comprehensive Income and Expenditure Statement.

Revenue Spend by Service

Revenue Spend by Type

Revenue Underspends/Overspends

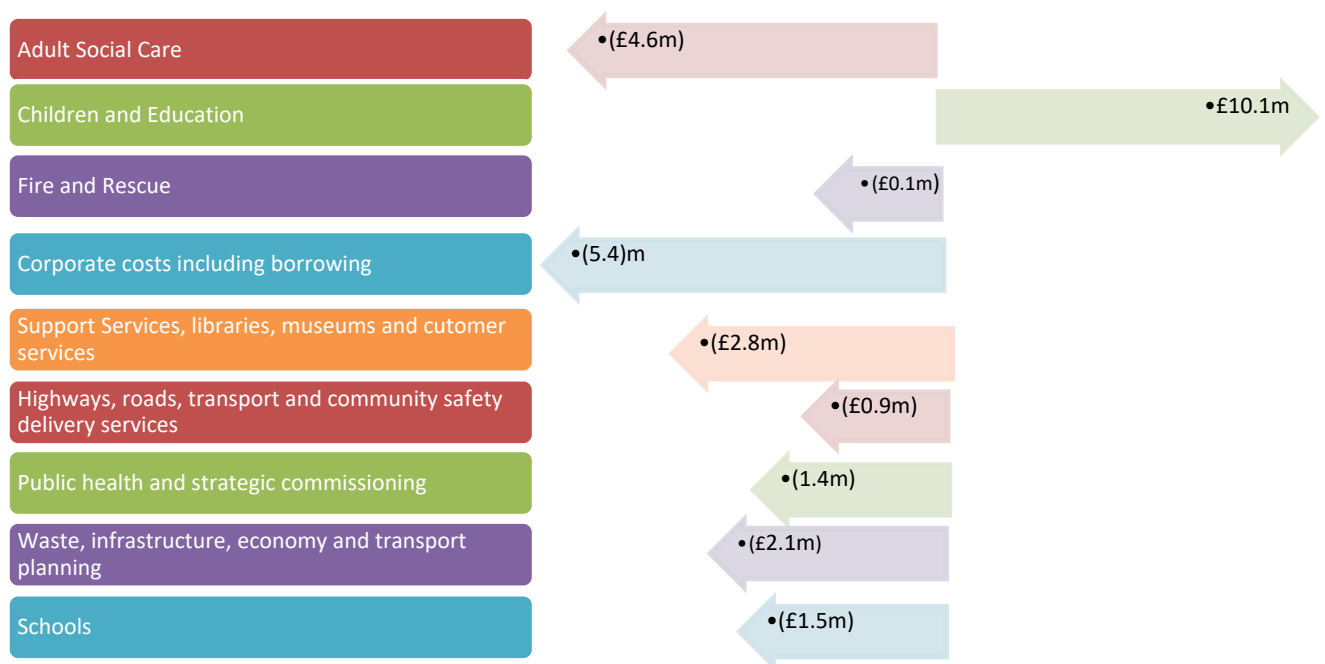

The net difference between our funding and expenditure for the year is £0.1 million. As part of our outturn we received £42.4m of Covid-related funding from the Government and Health and spent £47.5 million of this in the financial year. As a result, we have reduced our Covid reserves to £19.3m.

- £6.0m was to increase our volatility reserves to take account of increasing commercial and inflationary risk;
- £12.5m was a reduction due to allocations to specific projects delivering the Council's ambitions; and
- £8.1m was the residual net underspend on services.

Of the remaining £5.2 million added to reserves during the year:

- £3.6m was an increase in funds held with our external partners;

The chart below shows the service variance after accounting for Covid income and expenditure, Investment fund allocations and approved reserve movements during the year:

Capital spending and the value of our assets

We spent **£107.6 million** on the purchase and creation of assets in 2021/22 including **£22.1 million** on assets owned by other parties. Our initial estimate was **£219.2 million** but in-year adjustments for additions (for example, to spend newly awarded grants), reductions or rescheduling brought our approved budget for 2021/22 down to **£138.5 million** as at January 2022. Our capital spending was therefore **£111.6 million** less than our original budget, and **£30.9 million** less than the latest approved budget. This underspend was due to delays on individual projects. Most of this spending now is expected to be incurred in future years, with the budget for 2022/23 being **£175.1 million**.

The value of our fixed assets has increased from **£1,134 million** to **£1,345 million** in 2021/22.

The main reasons for this decrease are:

- **£29.3 million** of assets disposed of or through schools transferring to Academy status;
- A spend of **£85.1 million** increasing the value of our assets;
- A write-down of **£29.4 million** to reflect our assets' usage by services; and
- A net increase in the value of our assets of **£190.2 million** is a result of updated valuations to reflect market movements and usage changes.

Capital Spend by Service

Capital over/underspends compared to the budget at the start of the year

Savings and efficiencies

As part of the Medium-Term Financial Strategy the savings target set for the 2021/22 financial year was £8.0m. These savings were spread across a number of areas. Some of the larger items were:

- £0.9 million reduced in Children’s Services through the realignment of services and reduction of staff;
- £0.8 million reduction in cost as a result of the revised phasing of the capital programme;

- £0.7 million savings through managing the cost of externally commissioned care for adults; and
- £0.6 million saving from a review of Enabling Services expenditure on staffing, expenses and projects.

99.4% of the saving target has been delivered during the year despite the ongoing challenge presented by the Covid Pandemic.

Reserves

We planned to use £4.2 million of our reserves to support the delivery of services in 2021/22. However, services spent £1.4 million more than their cash-limited budget; when combined with the additional resources received during the year and the reclassification of the Dedicated Schools Grant deficit of £0.4 million as an unusable reserve, the outcome was that our usable revenue reserves increased overall by £0.3 million.

At 31 March 2022 our usable revenue reserves were therefore £244.5 million, of which £23.1 million was held by schools. We consider this to be a robust figure and allows us some flexibility to balance the challenges of meeting current and unknown future economic uncertainty alongside investment to improve our efficiency and the wider community economic recovery. We will continue to apply our Reserves Strategy which describes how and when these reserves should be used or added to. Based on our current

Medium Term Financial Strategy it is anticipated that the level of revenue reserves will reduce to £179.3m by the end of 2026/27.

Borrowing and Investments

Whilst the Council’s benchmark rate of return on investment in 2021/22 was 0.14%, our treasury management activity generated a higher average interest on investments of 0.29%. In line with the Treasury Management Strategy the Council has prioritised first security, then liquidity and yield in its investments. This involved investing in banks,

building societies and other local authorities, as well as external fund managers such as cash, property and bond funds. Our long-term debt outstanding was £321.4 million at 31 March 2022; and at 31 March 2022 we were holding £458.62 million of cash, cash equivalents and treasury investments.

Pensions

At 31 March 2022 our total pensions liability was £901.1 million, a decrease of £161.8 million over the year. The decrease is largely attributable to the re-measurement of liabilities relating to the Local Government Pensions Scheme to recognise

the changes in actuarial assumptions at the balance sheet date. This remains within the expected range and we are confident that this liability is well managed within the statutory arrangements.

Outlook

Pre-Existing Financial Challenges

The current Council Plan approved in February 2022 includes a 5-year medium-term financial strategy and reserves strategy that are updated annually. This gives greater alignment of the financial position and plans of the Council to the strategic priorities of thriving economy and places, a sustainable future and safe and healthy communities, as well as managing the risk inherent in providing a diverse range of services to a diverse community funded by numerous income streams.

The finance strategy recognised a number of risks to be monitored, managed and where uncontrollable to be financially underwritten:

- The broader economic environment, such as the impacts of movement in inflation, council tax base and interest rates on our day-to-day costs, income and debt repayments;
- Unforeseen medium/long term impact of the Covid-19 Pandemic;
- Prolonged uncertainty around Central Government's future decisions about local government financing, including a new funding model for adult social care to replace the social care council tax precept and the Better Care Fund grants;
- Dependency on locally collected Business Rates, placing greater importance on the need to maintain reserves to manage any volatility;
- Designing and delivering sustainable delivery of Special Educational Needs services within the level of DSG funding; and
- Pension cost increases arising from revaluations and any Central Government decisions about the scheme's funding mechanisms.

Covid-19

2021/22 has been a second highly unusual financial year due to the ongoing impact of Covid. Some areas have continued to face increases in demand and drops in planned income as well as the need to maintain a range of new services set up last year almost overnight. Other areas continued to see a temporary reduction in demand and Covid has limited our ability and capacity to invest in change and deliver our planned capital investments. It has been a period of sustained uncertainty as we adapt services and ways of operating in a post-Covid environment where our understanding of which changes will persist into the medium term is continually evolving.

We continued to receive significant and welcome additional funding from Government, in many different tranches, with numerous conditions attached, and at various times during the year, to help us support our communities through the Pandemic. The incremental provision of in-year funding, proliferation of small funding pots and understanding the changing financial impact of Covid on our costs and income have continued to provide for a challenging financial management environment.

The outturn figures reflect these factors and we remain a financially strong and resilient Authority and have not had to identify additional

savings in-year or re-base budgets. However, the potential additional costs and loss of income need to be managed to ensure the Council's

budget remains balanced and sustainable into the future.

Inflation

The annual inflation rate in the UK jumped to 9% in April 2022, the highest level since 1982, prompted by rising prices for utilities and fuel. The current forecasts indicate that the prices are expected to revert to a moderate annual increase from 2024/25 but the current inflationary pressure represents significant and potentially fundamental challenges for the County Council, residents and communities of Warwickshire.

Inflation will not only make providing our services more expensive but also expected to increase the demand for council services from the most vulnerable segments of the community. In addition to the direct cost of inflation, the rising cost of living and the National Living Wage will likely to have an indirect impact on our cost via the nationally negotiated annual pay awards.

Mitigation

These risks are common to all local authorities, and we continue to combat them through a mix of active management and financial planning. The specific plans to mitigate the financial risk associated with Covid-19 are:

- All Covid-related funding received is managed corporately, with decisions on the allocation of any resources requiring Corporate Board approval to ensure the effective use of resources;
- The taxbase volatility reserve, alongside the existing business rates appeals reserve provides for any deficits on the collection of the council tax and business

rates from the current economic downturn; and

- The reflection of a gradual economic recovery in projections of future resource levels in the Medium-Term Financial Strategy.

In order to face the challenge of the increasing inflation the organisation is already working on reviewing and reprioritising its plans to ensure the long-term sustainability of core services and delivery of the key priorities set out in the Council Plan.

Major Developments

Two major developments that we brought forward in 2020/21 to support economic growth and Warwickshire's recovery post the Covid-19 Pandemic have become operational in 2021/22.

Warwickshire Property and Development Group (WPDG) is a local authority trading company set up to deliver our policy objective of creating jobs and more homes across Warwickshire. In its first year of operation

WPDG reported operating losses before tax of £0.516m. The loss is due to the company beginning to incur costs such as salaries, IT costs and legal and professional fees from when it was set up, at its balance sheet date it had not yet started to generate income to cover these costs. This net loss position was anticipated, with the loss being slightly less than estimated in the approved business plan. Incurring a loss during the inception phase is normal for a new business and is not a cause for immediate concern.

The Warwickshire Recovery and Investment Fund has been set up to provide access to finance, on a repayable basis, that helps businesses in Warwickshire start, grow and scale-up; helps businesses locate in the county; and leverages additional resources for the county through investment and support for key growth businesses. Our investment will be a maximum of £140 million over the next five years and at the end of the 2021/22 financial year £1m of it has been approved.

Basis of preparation and presentation

In considering this report, you should note that the comparison of spend against service budgets which we use internally to assess our financial performance is not directly comparable to the cost of services disclosed in the Statement of Accounts. This is mainly due to the accounting adjustments required to comply with reporting requirements, which do not impact on the

amount of our spending to be met by local taxpayers, which is central to our in-year monitoring of our financial performance. The key differences relate to the way in which we account for items such as depreciation, impairment, reserves, provisions and carry-forwards. Each of these items is explained further in our accounting policies or the glossary.

Core Financial Statements

These comprise the four key pieces of information in the Statement of Accounts

<p>Comprehensive Income and Expenditure Statement</p>	<p>Balance Sheet</p>
<p>An accounting surplus of £81.5 million for 2021/22 has been reported; the outturn position is an £10.5 million surplus.</p> <p><i>This statement shows the accounting cost in the year of providing services rather than the amount to be funded from taxation. The main factors in the move are capital depreciation, revaluation and pensions charges.</i></p>	<p>An increase of £406.9 million in County Council’s net assets as at 31 March 2022.</p> <p><i>The balance sheet shows the value of the assets and liabilities recognised by the County Council. At 31 March 2022 the County Council’s net worth was £453.6 million.</i></p>
<p>Cash Flow Statement</p>	<p>Movement in Reserves Statement</p>
<p>A net cash outflow of £37.0 million in 2021/22 in cash or cash equivalents.</p> <p><i>This statement summarises the cash that has been paid to us and which we have paid to other organisations and individuals.</i></p>	<p>An increase of £14.9 million in the County Council’s usable reserves, made up of an increase of £3.0 million in revenue reserves and £11.9 million in capital reserves.</p> <p><i>This statement shows the movement in year on the different reserves held by the Council, analysed into usable reserves (i.e. those that can be used to fund spending or reduce taxation) and other reserves.</i></p>

Statement of accounting policies

This summarises the accounting rules and conventions we have used in preparing these financial statements. There have been no changes to our accounting policies during the year. During 2020/21 the Audit and Standards Committee agreed two changes to our accounting policies relating to group accounts and leases. Both of these policies were expected

to affect the preparation of the 2021/22 accounts but they were not required this year.

Notes to the core financial statements

The notes include more detail to support the information contained in the core financial statements as well as information on critical judgements and assumptions applied in the production of the accounts.

Other sections of this Document

As well as the Statement of Accounts for the County Council, this document includes separate sections for the Annual Governance Statement and the Statement of Accounts for the Warwickshire Pension Fund.

the future. The Annual Governance Statement also covers the Warwickshire Pension Fund.

The Annual Governance Statement describes the Council's Governance Framework and system of internal control. It includes a review of the effectiveness of this system in the past year and identifies key risks for the Council to manage in

The Warwickshire Pension Fund's Statement of Accounts describes the Fund's financial position and performance in 2021/22. While the County Council administers the Fund, the Fund's accounts represent its activities on behalf of all its member organisations. Further information about the Fund can be found in Note 1 of that section.

Statement of responsibilities for the statement of accounts

This section explains our responsibilities for our financial affairs and how we make sure we carry out these responsibilities properly, in line with the Accounts and Audit (Amendment) Regulations 2022 and the Accounts and Audit Regulations 2015.

Responsibilities of the Council

We do the following:

- Make sure that one of our officers is responsible for managing our financial affairs. In this council, the Strategic Director for Resources is responsible for this;
- Manage our affairs to make sure we use our resources efficiently and effectively and protect our assets; and
- Approve the statement of accounts.

Responsibilities of the Strategic Director for Resources

As the Strategic Director for Resources, I am responsible for preparing our statement of accounts. These accounts must present a true and fair view of our financial position, including our income and spending for the year.

In preparing our statement of accounts, I have:

- Selected suitable accounting policies and applied them consistently;
- Made reasonable and prudent judgements and estimates; and
- Followed the Chartered Institute of Public Finance and Accountancy/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom.

I have also:

- Kept proper accounting records which are up to date; and
- Taken steps to prevent and detect fraud and other irregularities.

I certify that the Statement of Accounts presents a true and fair view of the financial position of Warwickshire County Council at 31 March 2022 and the income and expenditure for the year ended 31 March 2022. The unaudited draft accounts were authorised for issue on 22 July 2022. These will then be audited and presented at a meeting of the Council, expected to be 7 February 2023. The approved accounts will then be authorised for issue on that date.

Rob Powell
Strategic Director for Resources

		224.0	~ Remeasurements of the net defined benefit liability/(asset)			-221.9
		216.3	Other comprehensive income and expenditure			-325.4
		224.2	Total comprehensive income and expenditure			-406.9

To arrive at the figures for each directorate in the table above we adjust the income and expenditure figures used internally to report our financial performance, as required by the Code and regulations. A reconciliation of these adjustments and more details as to what each adjustment relates to are shown in the Expenditure and Funding Analysis (Note 1) and the Adjustments between accounting basis and funding basis under regulations (Note 2) in conjunction with the Movement in Reserves Statement. For administrative reasons the Dedicated Schools Grant (DSG) is managed centrally as a single grant and shown within Schools in the CIES above. However, £82.4 million in 2021/22 was used to fund education related services provided by the Council (£84.9 million in 2020/21).

Figures for income, gains and surpluses are shown as negative (-) above.

Statement of accounting policies

This section summarises the accounting rules and conventions we have used in preparing these financial statements.

General

The content, layout and general rules we used to prepare these accounts comply with the Code of Practice on Local Authority Accounting 2021/22 ('the Code') issued by the Chartered Institute of Public Finance and Accountancy (CIPFA) in accordance with International Financial Reporting Standards (IFRSs).

Accruals of income and expenditure

Activity is accounted for in the year that it takes place. This means that income from the sale of goods or the provision of services is recorded in our accounts when the goods or services are transferred to the recipient in accordance with the performance obligations in the contract. Expenditure is recorded in our accounts when services are received, rather than when we actually make a payment, and supplies are recorded as expenditure when we use them or as inventories on the Balance Sheet until that point. Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract. Where income and expenditure have been recognised but cash has not been received/paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet, subject to a de minimis level for non-system generated accruals of £50,000. We do not expect the effect of this de minimis level to be material to the overall position.

Assets held for sale

Where we have decided to sell an asset and the asset is being actively marketed with a sale expected within 12 months of making that decision, it is categorised as a current asset held for sale. We value these at the lower of carrying amount and fair value less disposal costs. Those assets that we do not expect to sell within 12 months are not classed as assets held for sale and instead are valued at their previous use.

Apprenticeship Levy

The cost of the Levy is recognised as a direct cost of employment in the Comprehensive Income and Expenditure Statement (CIES) when it is paid to Her Majesty's Revenue and Customs (HMRC). When funds are transferred from the Government's Digital Apprenticeship Account to an approved training provider a training expense up to the value of the training provided, with a corresponding entry for a government grant, will be recognised in the CIES against the service benefiting from the training.

Cash and cash equivalents

Cash is money held in current bank accounts and overdrafts that are repayable on demand and are integral to daily cash flow management. Money held in call accounts and short-term funds invested for a term of three months or less are classified as cash equivalents because they are readily available to be converted into cash.

Contingent assets

We identify contingent assets where an event has taken place that gives the authority a probable asset whose existence will only be confirmed by the occurrence or non-occurrence of some uncertain future event not wholly within our control. Our contingent assets disclosure is shown in note 33. These are not included in our Balance Sheet.

Contingent liabilities

We identify contingent liabilities where either:

- A possible obligation has arisen from past events and whose existence will be confirmed by the occurrence or non-occurrence of some uncertain future event not wholly within our control; or
- A present obligation may arise from past event but is not recognised because either it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured reliably.

Our contingent liabilities disclosure is shown in note 34. These are not included in our Balance Sheet.

Employee benefits

Benefits payable during employment

The accounts reflect entitlements that have been earned by employees, such as salaries and wages, as a consequence of the service completed by them as at 31 March each year even if we would never normally make payments for them, such as annual leave and time-off in lieu not yet taken. These are accrued for in the cost of services in the CIES.

Termination benefits

Termination benefits are amounts payable as a result of a decision to terminate an officer's employment before normal retirement age or an officer's decision to accept voluntary redundancy. Termination benefits are recognised immediately as an expense to the service in the CIES at the earlier of when the authority can no longer withdraw the offer or when we recognise costs of a restructuring.

Post-employment benefits

As part of the terms and conditions of employment we offer retirement benefits. Although these benefits will not actually be payable until the employee retires, we account for post-employment benefits in the CIES at the time that employees earn their future entitlement.

Our employees are members of four different pension schemes, and we participate in one compensation scheme:

- The Local Government Pension Scheme;
- The Teachers' Pension Scheme;
- The Firefighters' Pension Scheme and the Firefighters' Injury Awards Scheme; and
- The National Health Service Pension Scheme.

All four pension schemes provide members with pensions and other benefits related to their pay and length of service. Details of these schemes, our accounting policies in relation to them and their impact on the financial statements are shown in note 37.

Events after the Balance Sheet date

We consider any material events that occur between the date of the Balance Sheet and the date the accounts are authorised for issue by the Strategic Director for Resources.

Exceptional items, prior period adjustments and changes to accounting policies

Exceptional items are material items of income or expenditure that are disclosed separately in the CIES to aid understanding of our financial performance.

Prior period adjustments are made where there are material adjustments applicable to prior years arising from changes in accounting policies or to correct a material error. Where a change to accounting policies is made it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for earlier years as if the policy had always applied.

Fair value

We value several classes of our assets at fair value. We define this as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In 2021/22 fair value applies to non-operational property, plant and equipment classified as surplus assets, investment properties, assets held for sale and financial instruments.

We use appropriate valuation techniques, maximising the use of relevant known data and thereby minimising the use of estimates or subjective valuations. We assess the level of uncertainty in our valuations by assigning our assets into three categories:

- Level 1 – quoted prices of identical assets or liabilities;
- Level 2 – inputs other than quoted prices that are observable, either directly or indirectly; and
- Level 3 – unobservable inputs.

Further detail is shown in notes 11 and 13.

Financial assets

Financial assets are classified based on our business model for holding them and their cash flow characteristics. There are three main classes:

- Amortised cost;
- Fair value through profit or loss (FVPL); and
- Fair value through other comprehensive income and expenditure (FVOCI) – designated equity instruments.

Financial assets measured at amortised cost are recognised on the Balance Sheet when we become a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to CIES for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. The amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest).

The fair value measurements of FVPL assets are based on the following techniques:

- Instruments with quoted market prices – the market price; and
- Other instruments with fixed and determinable payments – discounted cash flow analysis.

FVPL assets are recognised on the Balance Sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Fair value gains and losses are recognised as they arrive in the Surplus or Deficit on the Provision of Services. A financial instrument revaluation reserve exists to hold qualifying gains and losses on FVPL assets (note 20). Those that do not qualify impact the general fund and are held in an earmarked volatility reserve (note 7).

Equity instruments designated as FVOCI are those which are not held in order to give rise to contractual cashflows and are not held for trading. They are valued at fair value using the earnings multiple valuation method or at cost if suitable information is not available or appropriate. Movements in fair value are recognised in the CIES in Other Comprehensive Income and Expenditure and reflected in the Financial Instruments Revaluation Reserve. These gains or losses are only realised in the General Fund when the assets are sold. Interest is recognised in the CIES is the amount receivable for the year in the loan agreement.

We recognise expected credit losses on assets held at amortised cost or FVOCI either on a 12-month or lifetime basis as appropriate. Impairment losses are calculated to reflect our expectation that future cash flows might not take place because the debtor defaults on their obligations. Where risk has significantly increased since an instrument was recognised, losses are assessed on a lifetime basis. Where risk has not significantly increased or remains low, losses are assessed on the basis of 12-month expectations. For further details on the impairment of current debtors (allowances for bad debts) see note 15. These are shown in service expenditure in the CIES.

Financial liabilities

Financial liabilities are recognised on the Balance Sheet when we become party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently carried at their amortised cost. Annual charges to the CIES for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument in the year it was due. For our borrowings, this means that the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest) and interest charged to the CIES is the amount payable for the year in the loan agreement.

Trade creditors are due within one year and carrying value is deemed to equate to fair value.

Going concern

Local authorities cannot be created or dissolved without statutory prescription. The provisions of the Code on going concern reflect the economic and statutory environment in which local authorities operate and hence these accounts are prepared on the basis that the functions of the authority will continue in operational existence for the foreseeable future.

Grants

Grants are shown in the accounts in the year that they relate to rather than when we actually receive them. They are only shown in the accounts if we are certain that we will receive them. General grants we receive are shown as Taxation and non-specific grant income in the CIES. Revenue grants we receive to pay for spending on specific service activities are shown as income for the relevant service area when we are confident that any grant conditions have been met. Where revenue grants have conditions outstanding the grant is held as a receipt in advance; if the conditions are met but the grant remains unspent it is held in an earmarked reserve.

Capital grants are credited to the CIES when any relevant conditions governing their use have been met. This income is then reversed out and charged to the Capital Adjustment Account upon use, so the level of council tax is not affected. Unused non-conditional capital grants are held in the Capital Grants Unapplied Reserve. Before the conditions are met, capital grants are held on the Balance Sheet as a receipt in advance.

Group accounts

We have assessed a number of entities, including our wholly owned subsidiaries, in line with the Code and accounting standards. Having due regard to materiality of effects on the financial statements and other qualitative considerations that may affect the understanding by the readers of the accounts, we have not established a requirement to produce group accounts. Further details of all our associated companies, subsidiary company holdings and other related party details are outlined in note 40. In addition, we have accounted for schools' income and expenditure, assets and liabilities in the single entity financial statements rather than produce group accounts, in accordance with the Code.

Heritage assets

Our heritage assets are held for their cultural, environmental or historic associations, making their preservation for future generations important. We value our museum collections and valuables at the Courts, Judges House and Shire Hall at their insurance valuations. The Golden Tower of Leaves and our Waller of Woodcote archive collection of family and estate letters and deeds at County Records are valued at cost. It would not be cost effective to undertake revaluations for all other County Record documents and any valuations would not have a material impact on the accounts. Operational heritage assets used in the provision of services or for other activities are accounted for under other asset classes elsewhere in the Balance Sheet. Heritage assets classified as community or other assets are valued at insurance cost unless our valuer believes conventional methods relevant to their classification are more appropriate. Any gains on reclassification are taken to the Revaluation Reserve. More detailed information on the heritage assets we hold is available on our website <https://www.warwickshire.gov.uk>.

Income from selling non-current assets

We use the income from selling non-current assets (buildings, vehicles and land) to meet part of the cost of new capital spending or to repay borrowing. We show the gain or loss on the sale of assets in the CIES. This is the difference between the sale proceeds and the carrying value of an asset after allowing for costs relating to the sale of the asset. We take all costs of disposal incurred in a year to the CIES, regardless of whether all the proceeds of the related sale have been received. We use up to 4% of a capital receipt to meet these disposal costs.

The carrying value of the asset (the net book value after depreciation) and the sale proceeds are also reversed in the Movement in Reserves Statement (MIRS) and transferred to the Capital Adjustment Account and Capital Receipts Reserve respectively, so the level of council tax is not affected.

Where we have the right to capital receipts but have not yet received the cash payment, the transactions in the CIES are unaffected. However, instead of recognising the sales proceeds we instead recognise a Deferred Capital Receipt, which cannot be used to pay for our capital expenditure until the cash is received.

Intangible assets

Intangible assets are non-financial non-current assets that do not have physical substance and are controlled by the authority through custody or legal rights (such as software licences). We treat intangible assets in the same way as other non-current assets. We gradually reduce the value of intangible assets on a straight-line basis over their useful life (up to 10 years) to reflect the consumption of the economic or service benefit and charge this to the CIES. Intangible assets are valued at amortised historic cost.

Inventories

Inventories are materials or supplies that will be consumed in producing goods or providing services. The highways, roads and transport services stocks are valued at the cost of replacing them. Other stocks are valued at the cost we paid for them. These methods of valuing stocks are different from the methods set out by the Code. This does not have a material effect on the financial statements.

Investment property

Investment property assets are those held for rental purposes or capital value appreciation or both. They are not used for the delivery of services. Such assets are initially measured at cost. Investment property is not depreciated but is revalued at fair value every year. Gains and losses on revaluation, as well as disposal and/or rental income, are shown in the Financing and investment income and expenditure line in the CIES. Our valuation techniques in relation to investment properties are as outlined in note 26.

Leases

Leases can be designated as either finance leases or operating leases. Finance leases are those where substantially all the risks and rewards relating to the leased asset transfer to the lessee. All other leases are operating leases.

Finance leases

We deal with finance leases where we are the lessee in the same way as other capital spending. We include these as assets in the Balance Sheet and charge depreciation on them. Rentals are apportioned between a charge for the acquisition of the asset (recognised as a liability in the Balance Sheet at the start of the lease and written down annually as rent becomes payable) and a finance charge made each year to the CIES.

We do not have material finance leases where we are the lessor.

Operating leases

The vast majority of our lease rental payments (as lessee) are assessed to be operating leases and are charged evenly to the CIES over the life of the lease.

Where we grant an operating lease over a property or item of plant or equipment, the asset is retained on the Balance Sheet and the rental income is credited to the CIES as it is due.

We do not disclose contingent rents as they are not material to the financial statements.

Minimum Revenue Provision

We are required to make an annual contribution from revenue for the repayment of our debt as approved in our Treasury Management Strategy. This is known as the Minimum Revenue Provision (MRP). We calculate MRP on a weighted average straight-line basis using the average remaining useful life of our asset portfolio over the two asset categories of:

- Land, buildings and infrastructure; and
- Vehicles, plant and equipment.

Overheads and support service costs

All support service costs are held within the directorate within which they are managed. In accordance with the CIPFA Service Reporting Code of Practice 2021/22 support service costs are only apportioned to services on a relevant basis for the purposes of unit costs reporting on services when required for Government statistical comparability.

Pooled budgets

We are the host authority to a number of pooled budget arrangements. These are joint arrangements solely for the purposes of working together with other public sector bodies and which do not create separate entities. We have reported on those arrangements showing the total pooled resources and expenditure including the nature of those arrangements in the notes to the accounts. We have accounted for in our income, expenditure, assets and liabilities in our financial statements, only that where we are the commissioning body. This will include amounts owed to or owed by the other parties in the pooled budget arrangement to the authority where it is the commissioning body.

Property, plant and equipment

Assets that have a physical substance, are held for use in the production or supply of services and that are expected to be used during more than one financial year are classified as property, plant and equipment (PPE). The accounting policies specific to Infrastructure assets are set out separately below.

Recognition

Our spending on buying, creating or improving PPE is classed as capital spending provided that it is probable that the future economic benefits or service associated with the item will flow to us and the cost of the item can be measured reliably. Spending that does not provide a significant benefit in terms of value, asset life, or service performance or which falls below our de minimis level of £6,000 is charged to our revenue account in full in the year it occurs.

Measurement

Assets are initially measured at cost, comprising the purchase price and any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended. Assets are valued on the basis set out by CIPFA and in line with the Statements of Asset Valuation Practice and Guidance Notes issued by the Royal Institute of Chartered Surveyors. Our valuation process is led by the Council's Strategic Finance team in collaboration with the Strategic Assets Management team. External valuers are commissioned on a multi-year contract basis.

The closing balances on 31 March 2022 were determined in the following ways:

- Operational land and buildings are included in the Balance Sheet at their current value based on their existing use less an annual charge for depreciation. However, where there is insufficient market valuation evidence, for example schools, assets are included in the Balance Sheet at a depreciated replacement cost;

- Surplus assets are those which we do not use in our day-to-day work and which are not likely to be disposed of in the next twelve months. We include these assets in the Balance Sheet at fair value, based on highest and best use. These assets are revalued every year and so are not subject to depreciation;
- We include infrastructure assets, such as roads and bridges and community assets, vehicles and equipment in the Balance Sheet at the amount they cost when brought into use less an annual charge for depreciation. These assets are valued in this way because there is no meaningful market data available to calculate an existing use value; and
- Assets under construction are held in the Balance Sheet at the cost incurred on their production to date. When the asset is deemed operationally complete the balance is transferred to the appropriate asset class shown above and depreciation begins.

We revalue operational PPE assets held at a value other than depreciated historic cost annually to ensure their carrying amount is not materially different from their current value at year end.

When asset values rise above the amount we paid for them we add the difference to the Revaluation Reserve. When asset values go down, the reduction is charged to any available Revaluation Reserve balance held for that asset, with the remainder being charged to the relevant service line in the CIES. This charge is then reversed out in the MIRS so that there is no impact on council tax.

Impairment

Assets are assessed at each year-end to identify whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall. The accounting treatment of impairment losses is the same as that for revaluation losses shown above.

Depreciation

Depreciation is an accounting estimate used to spread the cost of an asset over its useful economic life. We charge depreciation on buildings over our valuer's estimate of their useful economic life (between 5 and 65 years), on roads and bridges over 30 years, and on vehicles and equipment over their own useful lives (between 3 and 20 years for vehicles and between 3 and 30 years for equipment).

The cost of depreciation is calculated by the following methodology:

- Our new assets are depreciated from the start of the financial year after they become operationally complete;
- Depreciation is calculated on a straight-line basis meaning that an asset's value falls equally each year throughout its life. If the gross value or remaining life of the asset changes due to expenditure, impairment or revaluation, the depreciation charge will change in the following year; and
- We generally charge depreciation on buildings as a single asset. However, if we determine that the value of major components within an asset are material with respect to the overall value of that asset, and that the lifetime of these components is significantly shorter than the remaining useful economic life of the asset, the major component is depreciated separately.

We do not charge depreciation on land we own, as it does not have a limited useful life, nor on investment properties or assets held for sale. Similarly, heritage assets are generally assessed to have infinite lives and so are not depreciated.

The estimated useful economic lives of our land and buildings are assessed by our valuers as part of the revaluation of these assets.

Derecognition

Assets are derecognised when they are replaced, sold or no longer owned. The amount of the asset written out is the carrying value (including any revaluations and accumulated depreciation). This leaves no residual value relating to the asset. When derecognition occurs, the carrying value derecognised and the proceeds received are added to the

calculation of the gain/loss on disposal. This is charged to the CIES and subsequently reversed out in the MIRS so that there is no impact on the general fund.

Property, plant and equipment – Infrastructure Assets

Infrastructure assets include carriageways, footways and cycle tracks, structures (e.g. bridges), street lighting, street furniture (e.g. illuminated traffic signals, bollards), traffic management systems and land which together form a single integrated network.

Recognition

Expenditure on the acquisition or replacement of components of the network is capitalised on an accrual basis, provided that it is probable that the future economic benefits associated with the item will flow to the authority and the cost of the item can be measured reliably.

Measurement

Infrastructure assets are generally measured at depreciated historical cost. However, this is a modified form of historical cost – opening balances for infrastructure assets were originally recorded in balance sheets at amounts of capital undischarged for sums borrowed as at 1 April 1994, which was deemed at that time to be historical cost.

Where impairment losses are identified, they are accounted for by the carrying amount of the asset being written down to the recoverable amount.

Depreciation

Depreciation is provided on the parts of the highways network infrastructure assets that are subject to deterioration or depletion and by the systematic allocation of their depreciable amounts over their useful lives. Depreciation is charged on a straight-line basis.

Annual depreciation is the depreciation amount allocated each year. The authority uses a useful economic life of 30 years for infrastructure assets.

Disposals and derecognition

When a component of the network is disposed of or decommissioned, the carrying amount of the component in the Balance Sheet is written off to the 'Other operating expenditure' line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement, also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal).

The written-off amounts of disposals are not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are transferred to the capital adjustment account from the General Fund Balance in the Movement in Reserves Statement.

The authority has determined in accordance with Regulation 30M of the Local Authorities (Capital Finance and Accounting) (England) (Amendment) Regulations 2022 that the carrying amounts to be derecognised for infrastructure assets when there is replacement expenditure is nil.

Provisions

We put amounts of money aside to meet future specific service payments. For future events to be reflected in provisions, they need to meet three tests:

- They must be the result of a past event;
- A reliable estimate can be made; and
- There must be a clear responsibility for the Council to make a future payment because of the past event.

Provisions are charged to the appropriate service line in the CIES when we become aware that it is probable a payment will be required. The provision is based on the best estimate of the likely settlement. When payments are made, they are charged to the provision already set up in the Balance Sheet.

Reserves

We keep reserves to pay for spending on projects we will carry out in future years, to protect us against unexpected events and to manage the financial risk of the uncertainty we face. Reserves include 'earmarked reserves' which are set aside for certain policy purposes and other 'general reserves' which represent resources set aside for purposes such as general events and managing our cash flow. By law, schools are entitled to keep any of their budgets they have not spent. These amounts are shown separately from other reserves.

Reserves are created by appropriating amounts from the Council's General Fund in the MIRS. When expenditure is financed from a reserve, the expenditure itself is charged to the appropriate service line in the CIES. The reserve is then appropriated back via the MIRS so that there is no net charge against council tax. Some reserves hold unspent funding which can only be applied in specific ways, such as the Capital Grants Unapplied and Capital Receipts Reserve.

Other 'unusable reserves' are kept to manage the accounting processes for non-current assets, financial instruments, and retirement and employee benefits:

- The capital accounting system requires us to maintain a Revaluation Reserve to reflect unrealised gains on non-current assets, and a Capital Adjustment Account to manage timing differences between their usage and financing;
- We maintain a Deferred Capital Receipts Reserve to recognise proceeds from the sale of assets where we have a right to the capital receipts but have not received cash payment;
- We maintain a Financial Instruments Revaluation Reserve to hold qualifying gains and losses on FVPL assets;
- We maintain an Accumulated Absences Reserve to hold the amount we have to accrue for post-employment benefits such as annual leave earned but untaken at the year-end so as not to affect the level of Council Tax;
- We maintain a Collection Fund Adjustment Account which holds the difference between the amounts required to be shown in the CIES for council tax and business rates and that required by legislation to be taken against the General Fund;
- We maintain a Dedicated Schools Grant (DSG) Adjustment Account to hold deficits on DSG as these cannot be offset against General Fund Reserves and must be carried forward and met from future DSG funding in line with current legislation and statutory requirements; and
- We maintain a Pensions Reserve to hold the difference between any increase in the accounting cost of pensions in the year and the statutory figure chargeable in any year, which is the contribution made by the authority.

Revenue expenditure funded from capital under statute

We undertake some capital spending during the year that does not result in the creation of an asset we own. Any money we spend this way must be charged to the CIES but be funded from capital resources, and so, we make an adjustment in the MIRS equal to the expenditure to reverse this to the Capital Adjustment Account.

Schools and schools' assets

The balance of control for local authority maintained schools, foundation, voluntary aided and voluntary controlled schools are all deemed to lie with the local authority. We therefore recognise schools' assets, liabilities, reserves and cash flows in our financial statements as if they were transactions, cash flow and balances of the authority. Any asset provided by a third party and consumed in the provision of an education service with schools or donated to the school will be treated as a donated asset. School assets are derecognised in full on the date that a school transfers to academy status. These are disposals for nil consideration. These losses on disposal/transfer are shown in the Other operating income and expenditure line in the CIES.

VAT

VAT payable is included as an expense only to the extent that it is not recoverable from HMRC. VAT receivable is excluded from income. We are subject to Partial Exemption: as long as the VAT we claim on purchases used to generate exempt income is less than 5% of all VAT claimed on purchases in the year, we can claim all our VAT back in full.

Note on Roundings

Individual tables presented within disclosures may not sum due to roundings. This does not reflect any inaccuracy or error.

Notes to the Core Financial Statements

Note 1: Expenditure and Funding Analysis and associated notes

The purpose of the Expenditure and Funding Analysis is to demonstrate to council tax payers how the funding available to the authority (i.e. grants, council tax and business rates) for the year has been used in providing services in comparison with those resources consumed and earned by the authority in accordance with generally accepted accounting practices. Income and expenditure accounted for under generally accepted accounting practices is presented more fully in the CIES.

Difference between General Fund surplus or deficit and Comprehensive Income and Expenditure Statement surplus or deficit on the Provision of Services	17.0	26.3	15.9	59.2
DSG Deficit in Year Transferred to DSG Adjustment Account - adjustment between funding and accounting basis			5.3	5.3
Total for MIRS	17.0	26.3	21.2	64.5

- a) **Adjustments for capital purposes** – this column adds in depreciation, impairment and revaluation gains and losses as well as revenue expenditure funded by capital under statute and capital grants used to fund that expenditure to the service lines within the CIES. It also includes:
- **Other operating expenditure** – income received on disposal of assets and the amounts written off on those assets are added;

- **Financing and investment income and expenditure** – statutory charges for capital financing i.e. Minimum Revenue Provision and other revenue contributions are deducted; and
 - **Taxation and non-specific grant income and expenditure** – credits for capital grants receivable in the year without conditions or for which conditions were satisfied in the year are added.
- b) **Net change for the Pensions adjustments** – this column adds the net change for the removal of pensions contributions and the addition of employee pension-related expenditure and income.
- **For services** – this represents the removal of the employer pension contributions made by the authority as allowed by statute and the replacement of current service costs and past service costs as a result of employee service; and
 - **For financing and investment income and expenditure** – the net interest on the defined benefit liability is added as a cost.
- c) **Other differences** – this column adds other differences between the amounts debited/credited to the Comprehensive Income and Expenditure Statement and amounts payable/receivable to be recognised under statute. These include:
- Taxation and non-specific grant income and expenditure – the difference between what is chargeable under statutory regulations for Council Tax and Business Rates and the income recognised under generally accepted accounting practices. This is a timing difference as any difference will be brought forward in future Surpluses or Deficits on the Collection Fund. Revenue grants that are receivable without conditions or service-specific stipulation are required to be shown within this line rather than within the Net Cost of Services.
 - Transfer of DSG Deficits – the amount by which we are required to transfer the deficit on schools' budgets to an unusable reserve in line with statutory requirements.

Expenditure and Income Analysed by Nature

2020/21 £m	Expenditure/Income	2021/22 £m
	Expenditure:	
359.2	~ Employee expenses	404.4
546.0	~ Other services expenses	576.4
39.9	~ Depreciation and amortisation	41.3
28.7	~ Impairment and revaluation losses (including reductions in fair value of investment property)	1.6
16.6	~ Interest payments	16.0
0.3	~ Precepts and Levies	0.3
24.2	~ Loss on the disposal of assets	20.9
1,014.8	Total Expenditure	1,060.9
	Income:	
-73.1	~ Fees, charges and other service income from contracts with customers	-91.5
-36.1	~ Other contributions, reimbursements and statutory income	-42.6
0.0	~ Revaluation gains (Restatement of prior PPE revaluation and impairment losses)	-86.8
-4.6	~ Interest and investment income (including increases in fair value of investment property)	-5.5
-310.7	~ Income from council tax	-326.1
-3.4	~ Pensions Gain on settlements and curtailments	-2.2
-579.1	~ Grants & non domestic rates income	-587.7
-1,006.9	Total Income	-1,142.4
7.9	Surplus or Deficit on the Provision of Services	-81.5

Total income received can be analysed on a segmental basis as follows:

2020/21 £m	Segmental Income Received	2021/22 £m
-42.0	~ Communities Directorate	-65.4
-90.3	~ People Directorate	-107.0
-15.8	~ Resources Directorate	-32.0
-268.1	~ Schools	-268.3
-520.9	~ Corporate Services and Resourcing	-578.7
-937.0		-1,051.4
-66.4	~ Capital Grants Credited to the CIES (Note 24)	-88.0
-3.4	~ Pension Gain on Settlements and Curtailments	-2.2
0.0	~ Revaluation Gains and profit on sale of investment property credited to the CIES (Notes 11 & 5)	-0.8
-1,006.9	Total Income Analysed on a segmental basis	-1,142.4

We lease some of our properties on long term contracts with customers, but these are not material. Any amounts outstanding at year end are shown amongst the debtors in note 15 as appropriate.

Note 2: Adjustments between accounting basis and funding basis under regulations

Adjustments between accounting basis and funding basis under regulations 2021/22	General Fund Balance	Capital Fund	Capital Receipts Reserve	Capital Grants Unapplied	Movement in Unusable Reserves net spending

Total adjustments	64.4	0.1	8.8	0.2	-73.5

Note 3: Significant items of income and expenditure and restatements of prior year figures

There have been no significant changes in the organisation's structure from 2020/21 to 2021/22. As any changes would not have had a material effect on the income and expenditure statement, we have not restated comparatives.

During 2021/22 we received £42.4m Covid funding to support our Covid response and recovery including government grants and NHS discharge claims. The cost of effectively managing the immediate response to the Pandemic and mitigating the long-term impact of Covid on our communities was £47.5m. The in-year funding shortfall has been funded from earmarked reserves that were set aside in 2020/21 for this purpose. At the end of the year the Council had £19.3m Covid -19 funding remaining in it is earmarked reserves to continue to support the work relating to ongoing Covid activity in 2022/23 and beyond.

In 2021/22 there was an increase in the carrying amount of our property, plant and equipment of £190.2 million. £86.8 million of this reverses revaluation decreases or impairment losses that had been charged to the surplus or deficit on the provision of services in previous years. The revaluation gain is shown in our gross income, by service in the CIES.

Note 4: Other operating expenditure

2020/21 £ m	Other operating expenditure	2021/22 £ m
0.3	Environment Agency Levy	0.3
24.2	Losses on disposal/transfer of non-current assets	20.9
24.4		21.2

The loss on the disposal/transfer of non-current assets in 2021/22 primarily relates to the transfer of schools to academy status.

Note 5: Financing and investment income and expenditure

2020/21 £ m	Financing and investment income and expenditure	2021/22 £ m
16.6	Interest payable and similar charges	16.0
18.7	Net interest on the net defined benefit liability	21.6
-2.5	Interest receivable and similar income	-1.8
-1.4	Unrealised gains or losses on financial assets held at fair value through profit and loss transferred to usable reserves	1.6
0.1	Unrealised gains or losses on financial assets held at fair value through profit and loss transferred to unusable reserves	-1.8
-9.6	Trading account income	-15.1
12.0	Trading account expenditure	17.4
2.0	Income and expenditure on investment properties and changes in their fair value	-0.8
0.3	Other investment expenditure	0.3
-0.7	Other investment income	-1.1
35.5		36.3

Note 6: Taxation and non-specific grant income and expenditure

2020/21 £ m	Taxation and non specific grant income and expenditure	2021/22 £ m
-310.7	Council tax income	-326.1
	Business rates income and expenditure	
-40.5	~ Business rates top up	-41.0
-18.3	~ Retained business rates	-26.6
3.7	Business rates pool growth (WCC share)	0.7
-2.6	Business rates pool surplus	-1.9
	Other non-ringfenced Government grants	
-3.7	~ Fire Pensions Fund Grant	-6.3
-78.7	~ Revenue grants	-64.7
-66.4	~ Capital grants and contributions	-88.0
-517.2		-553.9

Note 7: Transfers to/from earmarked reserves

Medium Term Financial Strategy	11.8		-16.5	46.7	42.0	0.0	6.6	48.6
Total	170.1	3.0	-27.1	84.4	230.5	-57.9	56.0	228.6

Earmarked Reserves are the money that we set aside to meet future known budget commitments or so we have the resources to respond to unforeseen events. A full list of reserves can be found in the 2021/22 Financial Outturn Report, available at <https://www.warwickshire.gov.uk>.

The categories of Earmarked Reserves we held are:

- School balances: accumulated underspends of schools held under a scheme of delegation;
- DSG Reserve: Deficits on DSG (not managed under a scheme of delegation) must now be held in an unusable reserve called the Dedicated Schools Grant Adjustment Account. At 1 April 2020 we were required to transfer from General Fund earmarked reserves the deficit brought forward. This is shown above and in note 20;
- External Commitments Reserves: unused funding received from third parties with conditions on its use is carried forward until the conditions are met;
- Redundancy Fund: resources set aside to meet the costs of redundancies that arise as a result of changes to our services and the way they are delivered;

- Insurance Fund: resources set aside to meet the costs of self-insurance and any excesses on our insurance policies;
- DSG Offset Fund: we are holding £13.7 million in a DSG Offset Fund. This is part of our medium-term financial strategy to ensure sufficient funds are available to meet a future deficit when either we have approval to fund deficits from general reserves or the current regulations change;
- Investment Funds: funding to deliver a future programme of activity to deliver the outcomes and priorities in the Council Plan;
- Projects and Policies Reserves: funding to deliver projects and policies approved by the Council that extend over more than one financial year;
- Volatility Reserves: a number of the Council's activities and costs are volatile over time. Rather than managing this volatility on an annual basis the volatility reserves are used to smooth the financial impact across financial years;
- Management of Directorate Risk Reserves: as part of our Reserves Strategy up to a maximum of 3% of a directorate's net revenue budget (2% for Resources directorate) is held to manage in-year variations between planned and actual spend;
- Covid Grants Reserves: funding received from Government to support the covid response and recovery that had not been used by the end of the financial year; and
- Medium Term Financial Strategy (MTFS): funding available to support the delivery of the Council's MTFS. Of the £48.6 million in this reserve at 31 March 2022, £41.1 million is planned to be used as part of the resourcing delivery of our 2022-27 MTFS.

Note 8: Property, plant and equipment

Property, plant and equipment	Land and buildings £ m	Surplus assets £ m	Vehicles, machinery, furniture and equipment £ m	Roads and bridges* £ m	Country parks and open spaces £ m	Assets under construction £ m	Total £ m

Net book value at 31 March 2022	740.6	4.6	13.1	490.4	5.3	79.2	1,333.2

* In accordance with the Temporary Relief offered by the Update to the Code on infrastructure assets (Roads and Bridges) this note does not include disclosure of gross cost and accumulated depreciation for infrastructure assets because historical reporting practices and resultant information deficits mean that this would not faithfully represent the asset position to the users of the financial statements.

The authority has chosen not to disclose this information as the previously reported practices and resultant information deficits mean that gross cost and accumulated depreciation are not measured accurately and would not provide the basis for the users of the financial statements to take economic or other decisions relating to infrastructure assets.

The authority has determined in accordance with Regulation 30M of the Local Authorities (Capital Finance and Accounting) (England) (Amendment) Regulations 2022 that the carrying amounts to be derecognised for infrastructure assets when there is replacement expenditure is nil.

Net book value at 31 March 2021	572.8	5.1	10.9	474.9	2.2	56.9	1,122.8

Our land and building assets include schools, fire stations, libraries, waste disposal sites and other buildings. Assets we have disposed of mainly relate to 8 schools that have transferred to Academy status during the year.

Depreciation

We charge depreciation on buildings over our valuer's estimate of their useful economic life (between 5 and 65 years), on roads and bridges over 30 years, and on vehicles and equipment over their own useful lives (between 3 and 20 years for vehicles and between 3 and 30 years for equipment).

Capital commitments

At 31 March 2022, the authority had entered into a number of contracts for the construction or enhancement of property, plant and equipment in 2021/22 and future years. The total of those payments we were still due to make on capital schemes that were not yet finished, or which we had not finished paying for, is £21.6 million. Similar commitments at 31 March 2021 were £11.9 million.

The three largest outstanding commitments are as follows:

1. Highways maintenance contract - £10.5 million;
2. BDUK Broadband contract no 3 - £8.7 million; and
3. New Special Educational Needs and Disabilities school - £1.3 million.

Effects of changes in estimates

There have been no material changes to our accounting estimates for property, plant and equipment in 2021/22.

Revaluations

We carry out a programme of revaluations that ensures all property, plant and equipment required to be measured at fair value for the asset type is revalued annually. The table below shows the date at which our property, plant and equipment assets were last valued.

Revaluations	Land and buildings £ m	Surplus Assets £ m	Vehicles, machinery, furniture and equipment £ m	Roads and bridges £ m	Country parks and open spaces £ m	Assets under construction £ m	Total £ m
Carried at Historical Cost	59.3	0.0	13.1	490.4	5.3	79.2	647.3
Valued at current value as at:							
31st March 2022	681.3	4.6	0.0	0.0	0.0	0.0	685.9
Total cost or valuation	740.6	4.6	13.1	490.4	5.3	79.2	1,333.2

All our assets carried at current value were valued in 2021/22. Valuation of land and buildings were carried out in accordance with the methodologies and basis for estimation set out in the professional standards of the Royal Institution of Chartered Surveyors.

All our Surplus Assets fall within the Level 2 - Fair value category, valued using observable inputs. There has been no change in categorisation during the year.

Note 9: School property, plant and equipment

The value of our school property, plant and equipment is £524.9 million (2020/21 - £399.5 million). The table below shows a breakdown across the various types of school.

School property, plant and equipment At 31 March 2022	Land £ m	Buildings £ m	Other Assets £ m	Total £ m	Number of Schools
Community Schools	123.5	178.3	1.8	303.6	68
Voluntary Aided Schools	39.7	48.1	0.0	87.8	25
Voluntary Controlled Schools	38.1	60.0	0.0	98.1	31
Foundation Schools	9.1	26.3	0.0	35.4	6
Net book value at 31 March 2022	210.4	312.7	1.8	524.9	130

School property, plant and equipment At 31 March 2021	Land £ m	Buildings £ m	Other Assets £ m	Total £ m	Number of Schools
Community Schools	124.0	97.8	1.6	223.4	70
Voluntary Aided Schools	39.9	20.6	0.0	60.5	26
Voluntary Controlled Schools	59.5	30.5	0.0	90.0	36
Foundation Schools	9.6	16.0	0.0	25.6	6
Net book value at 31 March 2021	233.0	164.9	1.6	399.5	138

The number of schools has reduced by 8 which chose to take up academy status in 2021/22. Whilst we recognise the assets of voluntary aided, voluntary controlled and foundation schools in our accounts we do not have the right to access or dispose of these assets to settle any liabilities. We have no donated school assets.

Note 10: Heritage assets

The net book value of the heritage assets we hold is £5.0 million (£4.6 million in 2020/21). There have been no material acquisitions during 2021/22 and there have not been any significant disposals of heritage assets. More detailed information about the specific heritage assets we hold is on our website <https://www.warwickshire.gov.uk>.

Note 11: Investment properties

We classify a number of properties as investment properties, most of which are leased out to third parties under operating leases.

The following items of income and expense have been accounted for in the Financing and investment income and expenditure line in the CIES:

31 March 2021 £ m	Investment properties	31 March 2022 £ m
0.1	Direct net operating expense arising from investment property	0.0
0.1	Net gain(-) /loss	0.0

The table below summarises the movement in the fair value of investment properties over the year.

31 March 2021 £ m	Investment properties	31 March 2022 £ m
23.6	Balance at the start of the year	4.9
-18.7	Disposals	0.0
0.0	Net gains from fair value adjustments	0.8
4.9	Balance at the end of the year	5.7

The table below shows the fair value of these assets.

Investment Properties - Fair value	Quoted Market Price - Level 1 £ m	Using Observable Inputs - Level 2 £ m	Unobservable Inputs - Level 3 £ m	Total £ m
31st March 2022	0.0	5.7	0.0	5.7
31st March 2021	0.0	4.9	0.0	4.9

There have no changes in the year between levels.

Note 12: Intangible Assets

We account for our software as intangible assets, to the extent that the software is not an integral part of a particular IT system accounted for as a hardware item of property, plant and equipment. Our intangible assets include both purchased licences and internally generated software.

The carrying amount of intangible assets is amortised on a straight-line basis. The amortisation of £1.1 million (£1.0 million in 2020/21) was charged to revenue in 2021/22.

The movement on intangible asset balances during the year is as follows:

2020/21 £ m	Intangible assets	2021/22 £ m
7.6	Gross book Value at 1 April	7.8
-4.6	Amortisation balance at 1 April	-5.6
3.0	Net book value at 1 April	2.2
	Changes in the year	
0.2	~ Spending on assets	0.0
-0.1	~ Value of assets we have sold	0.0
	Amortisation	
0.1	~ Amortisation written off on disposal	0.0
-1.0	~ Amortisation	-1.1
2.2	Net book value at 31 March	1.1
7.8	Gross book Value at 31 March	7.8
-5.6	Amortisation balance at 31 March	-6.7
2.2	Net book value at 31 March	1.1

All software is valued at historic cost. We own a number of software licences across the authority which are written off to revenue over their expected useful lives.

Note 13: Financial instruments

The borrowings and investments disclosed in the Balance Sheet are made up of the following categories of financial instruments:

Financial Assets	31 March 2021			31 March 2022		
	Current £m	Long-term £m	Total £m	Current £m	Long-term £m	Total £m

Creditors that are financial instruments	77.4	89.8
Creditors that are not financial instruments	71.6	69.5
Total Creditors	149.0	159.3

The valuation of financial instruments has been classified into the three levels of fair value hierarchy required in the Code according to the quality and reliability of the information and techniques used to value them at fair value.

The fair values of financial liabilities and financial assets carried in the balance sheet at contractual amounts have been assessed by calculating the present value of the cash flows that will take place over the remaining term of the instruments. (Level 1 in the fair value hierarchy).

The difference between the long-term borrowing nominal amounts carried in the Balance Sheet and their fair value is based on a calculation that uses new loan rates to estimate what it would cost to borrow a similar portfolio of loans at the Balance Sheet date. These loans are with the Public Works Loan Board with interest rates fixed on the date of the initial lending. For more details see note 14.

We use an external expert to provide the fair values for our borrowings, which along with our other financial assets held in the amortised cost and fair value through profit and loss categories, are Level 2 in the fair value hierarchy.

Equity instruments assets are valued internally using the earnings multiple valuation method based on the latest available accounts for the companies in which we hold shares. Details are shown in note 40. Where that data is not available, they are valued at cost. (Level 3 in the fair value hierarchy).

Investments held at amortised cost of £280.3 million (£178.2 million in 2020/21) consist of bank, building society and local authority investments which are held solely for payment of principal and interest and a business model to collect contractual cash flows. The carrying amount and fair value consist of the principal amount and accrued interest to 31 March.

Assets held at fair value through profit and loss of £43.9 million (£43.7 million in 2020/21) are made up of two funds: Threadneedle Social Bond Fund and CCLA Property Fund. At 31 March 2020 the CCLA Property Fund was gated (meaning no investors could withdraw from the fund) by the Fund manager, as a result of the Covid-19 pandemic and its effects on the accurate valuation of the property portfolios it held. This meant we were unable to request for these funds to be cashed in and we re-categorised the CCLA as a long-term investment. Whilst the fund is no longer gated the cost of requesting the funds in the short-term means that we have determined that this investment should remain as a long-term investment. The carrying amount and fair value are based on unit prices provided through fund manager statements.

In assessing fair value, we have made the following assumptions:

- No early repayment or impairment is recognised;
- Where an instrument will mature in the next 12 months, carrying amount is assumed to approximate to fair value; and
- The fair value of trade and other receivables is taken to be the invoiced or billed amount.

There have been no transfers between input levels in 2021/22 and no changes in the valuation techniques for financial instruments during the year.

The fair value hierarchy of assets and liabilities is shown in the table on the following page.

Financial Instruments - Fair value 31 March 2022	Valued at Cost	Quoted Market Price - Level 1	Using Observable Inputs - Level 2	Unobservable Inputs - Level 3	Total

Note 14: Nature and extent of risk arising from financial instruments

Our activities expose us to a variety of financial risks:

- Credit risk – the possibility that other parties might fail to pay amounts due to us;
- Liquidity risk – the possibility that we might not have funds available to meet our commitments to make payments; and
- Market risk – the possibility that financial loss might arise as a result of changes in such measures as interest rates and stock market movements.

Our overall financial risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the resources available to fund services. Financial risk management is carried out by a central treasury management team, under policies approved by the Council annually in the Treasury Management Strategy, available via <https://www.warwickshire.gov.uk>. We have written policies covering specific areas, such as interest rate risk, credit risk and the investment of surplus cash.

Credit risk

Credit risk arises from deposits with banks and financial institutions, as well as credit exposures to our customers. Our Accounting Policies note describes our overall approach to evaluating impairments to be reflected in the carrying value of our financial assets.

Many of the invoices we raise are the result of statutory obligations. However, where we are providing non statutory goods or services to customers, we consider their ability to pay. A number of checks are available to managers as outlined in our Corporate Debt Recovery Policy. Our current debtors, including trade debtors, are assessed at each year end for impairment. This is assessed using aged debt analysis and past experience of bad debt profiles. The change in the bad debt provision during the year and any amounts found to be irrecoverable are charged against services in the Net Cost of Services in the CIES. The amount of our bad debt provision is shown in note 15.

We have assessed our potential maximum exposure to credit risk, based on experience of default and collectability over the last five financial years. This has been adjusted to reflect current market conditions. However, there is no effect as there is no instance of institutions that meet our credit ratings defaulting in the last five years. Deposits are not made with banks and financial institutions unless they are rated independently with a minimum score as laid out in the Treasury Management Strategy.

Liquidity risk

As we have ready access to borrowings from the Public Works Loan Board, there is no significant risk that we will be unable to raise finance to meet our future commitments under financial instruments. Instead the risk is that we will be bound to replenish a significant proportion of our borrowings at a time of unfavourable interest rates. To mitigate this, our strategy is to ensure that when taking out new borrowing we spread maturity dates to match future cash flows.

The maturity analysis of financial liabilities is as follows:

2020/21 £ m	Loans we have not yet repaid	2021/22 £ m
	We owe money to:	
321.4	~ Public Works Loans Board	321.4
321.4	Total	321.4
	When we will pay the money back:	
18.0	Between 5 and 10 years	18.0
303.4	More than 10 years	303.4
321.4	Total	321.4

Our level of borrowing is due to paying for capital spending in previous years. We have not borrowed any money from external sources in 2021/22 to pay for new capital spending.

We use cash reserves which we have set aside to support future years' revenue budgets to invest in the short term.

All trade and other payables are due to be paid in less than one year.

Market risk

Interest Rate Risk

We are exposed to significant risk in terms of our exposure to interest rate movements on our borrowings and investments. Movements in interest rates have a complex impact. For instance, a rise in interest rates would have the following effects:

- Borrowings at variable rates – the interest expense charged to the CIES will rise;
- Borrowings at fixed rates – the fair value of the borrowings will fall;
- Investments at variable rates – the interest income credited to the CIES will rise; and
- Investments at fixed rates – the fair value of the assets will fall.

As part of our strategy for managing interest rate risk we aim to keep a maximum of 25% of our borrowing in variable rate loans.

We have an active strategy for assessing interest rates exposure that forecasts any adverse changes on a quarterly basis and assesses the impact to be incorporated into the medium-term financial strategy. According to this assessment strategy, at 31 March 2022, if interest rates had been 1% higher with all other variables held constant, the financial effect would be:

- No change in the fair value of fixed rate investment assets; and
- A decrease in fair value of fixed borrowing of £75.1 million (£86.0 million in 2020/21).

Changes in interest payable and receivable on variable rate borrowings and investments will be posted to the CIES and affect the General Fund. Movements in the fair value of fixed rate investments will be reflected in the CIES.

Price risk

We have some shareholdings in specific interests, and we are not in a position to diversify our portfolio. The current value of the shareholding is £2.2 million. For these equity instrument holdings, we have irrevocably elected to recognise any movements in price as gains and losses recognised in Other Comprehensive Income in the CIES. In 2021/22 this amounted to no gain or loss. Any gain or loss will not be credited or charged to the General Fund until such times as shareholdings are either impaired, sold or derecognised. We also have some investments held as Fair Value through Profit and Loss. All profits and losses on sales and impairments as well as in-year valuation movements on these assets are recognised immediately in the CIES. We have not disposed of any of these holdings this year. At 31 March 2022 we recognised a total net gain of £0.1 million in the CIES. One of these investments has been classified as a pooled investment vehicle which allows us to apply a statutory override which means that any changes in fair value do not hit the General Fund but are reversed in the MIRS and placed in the unusable Financial Instruments Revaluation Reserve until the investment is either sold or de-recognised. The other is not classed as a pooled investment vehicle, so the statutory override does not apply and changes in fair value are reflected in the General Fund in the year.

Treasury management

We comply with CIPFA's Treasury Management in Public Services Code of Practice and the Ministry for Housing, Communities and Local Government guidance on local government investments issued in March 2004. An updated version of the latter was released in February 2018 to apply to accounting periods from 1 April 2018 onwards.

We aim to achieve the optimum return on our investments commensurate with proper levels of security and liquidity. The borrowing of monies purely to invest and make a return is unlawful and we do not engage in such activity. Our external fund managers comply with the Annual Investment Strategy, approved by Elected Members on an annual basis. The agreement between us and the fund managers additionally stipulates additional guidelines and limits in order to manage risk.

Note 15: Debtors

31 March 2021 £ m	Short-term debtors	31 March 2022 £ m

36.6	Other accruals to External Organisations and Individuals	45.3
149.0	Balance at the end of the year	159.4

Note 18: Provisions

Our provisions total £7.5 million (£7.8 million 2020/21).

Our former liability insurers, Municipal Mutual Insurance (MMI) went into run-off (ceased to write new business) on 30 September 1992, following which a contingent Scheme of Arrangement became effective on January 1994 to ensure a smooth run-off should MMI subsequently be declared insolvent. In the event of the Scheme being triggered, claims paid by MMI after 30 September 1992 will be liable to claw back at a percentage to be determined by the administrators, with subsequent claims to be paid in part at the same percentage. A Supreme Court judgement relating to establishment of liability arising from mesothelioma claims under employers' liability policies has resulted in the

increased possibility of the Scheme being triggered. We have set aside £2.0 million to cover the claw back and the outstanding claims.

We have to account for our share of non-domestic rating appeals that are still to be resolved by the Valuation Office Agency for the District and Borough Councils in Warwickshire. We cannot predict when these appeals may be raised or settled, so we have assumed that these settlements will be made within 1 year for the purposes of these accounts. The amount we have provided is £4.3 million.

We have reassessed the balance of liabilities between the County Council and the Firefighters' Pension Fund. Some of the final costs are still uncertain and so a provision of £0.6 million has been included.

All other provisions, totalling £0.6 million, are individually insignificant.

Note 19: Usable Reserves

Movements in our usable reserves are detailed in the Movement in Reserves Statement and in notes 1 and 2. A summary of revenue and capital usable reserves is shown below:

31 March 2021 £ m	Usable reserves	31 March 2022 £ m
21.4	General Fund	26.0
230.5	Earmarked Reserves	228.6
0.7	Capital Fund	1.0
17.7	Capital Receipts Reserve	3.5
3.8	Capital Grants Unapplied	29.9
274.1	Total usable reserves	289.0

Note 20: Unusable Reserves

31 March 2021 £ m	Unusable reserves	31 March 2022 £ m
188.6	Revaluation Reserve	269.9
667.6	Capital Adjustment Account	808.2
9.1	Deferred Capital Receipts Reserve	4.1
2.1	Financial Instruments Revaluation Reserve	4.0
-11.6	Accumulated Absences Reserve	-9.6
-12.1	Collection Fund Adjustment Account	0.2
-8.3	Dedicated Schools Grant Adjustment Account	-11.1
-1,062.8	Pensions Reserve	-901.1
-227.4	Total unusable reserves	164.6

Revaluation Reserve

The Revaluation Reserve contains the gains we have made arising from increases in the value of our property, plant and equipment and intangible assets. The balance is reduced when assets with accumulated gains are:

- Revalued downwards or impaired and the gains are lost;
- Used in the provision of services and the gains are consumed through depreciation; or
- Disposed of and the gains are realised.

The Reserve contains only revaluation gains accumulated since 1 April 2007, the date the Reserve was created. Accumulated gains arising before that date are consolidated into the balance on the Capital Adjustment Account.

31 March 2021 £ m	Revaluation Reserve	31 March 2022 £ m
193.1	Balance on 1 April	188.6
10.0	Revaluation increases	141.2
-2.3	Revaluation decreases	-37.7
-6.0	Depreciation adjustment to Capital Adjustment Account	-5.9
-6.2	Revaluation written off on disposal	-16.3
188.6	Balance on 31 March	269.9

Capital Adjustment Account

The Capital Adjustment Account absorbs the timing differences arising from the different arrangements for accounting for the consumption of non-current assets and for the financing of the acquisition, construction or enhancement of those assets under statutory provisions:

- The Account is debited with the cost of acquisition, construction and enhancement as depreciation, impairment and revaluation losses and amortisations are charged to the CIES (with reconciling postings from the Revaluation Reserve to convert fair value figures to a historical cost basis). The Account is credited with the amounts we set aside as finance for the costs of acquisition, construction and enhancement;
- The Account contains the accumulated gains and losses on investment properties; and
- The Account also contains revaluation gains accumulated on property, plant and equipment before 1 April 2007, the date that the Revaluation Reserve was created to hold such gains. Note 2 provides details of the source of all the transactions posted to the Account, apart from those involving the Revaluation Reserve.

31 March 2021 £ m	Capital Adjustment Account	31 March 2022 £ m
679.2	Balance on 1 April	667.6
0.0	Revaluation increase	0.8
-32.0	Revaluation decrease	-42.2
5.4	Reversal of previous impairments	129.0
6.0	Depreciation adjustment to Revaluation Reserve	5.9
6.2	Revaluation written off on disposal	16.3
-47.8	Value of asset disposals	-25.6
-20.8	Transfer of spending on assets we do not own	-22.1
-39.9	Depreciation charge to revenue	-41.3
11.4	Minimum revenue provision (MRP)	10.9
99.9	Money used to buy assets	108.9
667.6	Balance on 31 March	808.2

Deferred Capital Receipts Reserve

The Deferred Capital Receipts Reserve holds the gains recognised on the disposal of non-current assets but for which cash settlement has yet to take place. Under statutory arrangements, the authority does not treat these gains as useable for financing new capital expenditure until they are backed by cash receipts. When the deferred cash settlement eventually takes place, amounts are transferred to the Capital Receipts Reserve.

31 March 2021 £ m	Deferred Capital Receipts reserve	31 March 2022 £ m
11.4	Balance on 1 April	9.1
9.1	Transfer of deferred sale proceeds credited as part of the gain/loss on disposal to the comprehensive Income and Expenditure Statement	0.0
-11.4	Transfer to the Capital Receipts Reserve upon receipt of cash	-5.0
9.1	Balance on 31 March	4.1

Financial Instruments Revaluation Reserve

The Financial Instruments Revaluation Reserve contains the gains/losses made by the authority arising from increases/decreases in the value of its equity investments that are measured at fair value through other comprehensive income plus those financial assets valued at fair value through profit and loss for which a statutory override exists, because they meet the conditions of being classified as a pooled investment vehicle. This means that changes in their fair value do not hit the General Fund.

The balance is reduced when investments with accumulated gains are:

- Revalued downwards or impaired and the gains are lost; or
- Disposed of and the gains are realised.

31 March 2021 £ m	Financial Instrument Revaluation Reserve	31 March 2022 £ m
2.1	Opening Balance	2.1
0.1	Upward revaluation of investments	1.9
-0.1	Downward revaluation of investments	0.0
2.1	Balance at 31 March	4.0

Accumulated Absences Account

The Accumulated Absences Account absorbs the amounts that would otherwise affect the General Fund from accruing for compensated absences earned but not taken in the year, e.g. annual leave entitlement carried forward at 31 March. Statutory arrangements require that the impact on the General Fund is neutralised by transfers to or from the Account.

31 March 2021 £ m	Movement in Accumulated Absences Account	31 March 2022 £ m
-6.6	Balance on 1 April	-11.6
6.6	Settlement or cancellation of accrual made at the end of the preceding year	11.6
-11.6	Amounts accrued at the end of the current year	-9.6
-5.0	Amount by which officer remuneration charged to the Comprehensive Income and Expenditure Statement on an accruals basis is different from remuneration chargeable in the year in accordance with statutory requirements	2.0
-11.6	Balance on 31 March	-9.6

Collection Fund Adjustment Account

The Collection Fund Adjustment Account manages the differences arising from the recognition of council tax and business rates income in the Comprehensive Income and Expenditure Statement as it falls due compared with the statutory arrangements for paying across amounts due to the General Fund.

31 March 2021 £ m	Movement in Collection Fund Adjustment Account	31 March 2022 £ m
-1.2	Balance on 1 April	-12.1
-3.1	Amount by which council tax income credited to the Comprehensive Income and Expenditure Statement is different from council tax income calculated for the year in accordance with statutory requirements	3.8
-7.8	Amount by which non domestic rates income credited to the Comprehensive Income and Expenditure Statement is different from non domestic rate income calculated for the year in accordance with statutory requirements	8.5
-12.1	Balance on 31 March	0.2

Dedicated Schools Grant Adjustment Account

The Dedicated Schools Grant (DSG) Adjustment Account is required to hold the deficits on DSG as these cannot be offset against General Fund Reserves and must be carried forward and met from future DSG funding in line with current legislation and statutory requirements. The deficit is removed from the CIES and reversed through the MIRS into this account.

31 March 2021 £ m	Dedicated Schools Grant (DSG) Adjustment Account	31 March 2022 £ m
-3.0	Balance on 1 April	-8.3
-5.3	Deficit on Schools Budget for the year	-2.8
-8.3	Balance on 31 March	-11.1

Pensions Reserve

The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post-employment benefits and for funding benefits in accordance with statutory provisions. We account for post-employment benefits in the CIES as the benefits are earned by employees accruing years of service, updating the liabilities to reflect inflation, changing assumptions and investment returns on any resources set aside to meet costs. However, statutory arrangements require benefits earned to be financed, as we make employer's contributions to pension funds or eventually pay any pensions for which we are directly responsible. The debit balance on the Pensions Reserve therefore shows a substantial shortfall in the benefits earned by past and current employees and the resources we have set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time that the benefits come to be paid.

On 31 March 2021 £ m	Pensions Reserve - All Schemes	On 31 March 2022 £ m
-812.6	Balance as 1 April	-1,062.8
-224.0	Remeasurements of net defined (liability)/asset	231.8
0.0	Effect of business combinations and disposals	-10.0
-76.3	Reversal of net charges made for retirement benefits	-116.7
46.4	Employer's pension contributions and direct payments to pensioners payable in the year	50.3
3.7	Grant funding of firefighters' pensions liabilities	6.3
-1,062.8	Balance at 31 March	-901.1

Note 21: Cash Flow Statement – operating activities

The surplus or deficit on the provision of services has been adjusted for the following non-cash movements:

31 March 2021 £m		31 March 2022 £m
38.9	Depreciation	40.3
26.6	Impairment and downward valuations	-87.6
1.0	Amortisation	1.1
0.0	Acquisition of donated assets	-1.4
27.2	Increase/(decrease) in creditors	11.4
-11.4	(Increase)/decrease in debtors including bad debts	-15.2
0.1	(Increase)/decrease in inventories	-0.2
26.2	Movement in pension liability	60.1
47.8	Carrying amount of non-current assets and non-current assets held for sale, sold or derecognised	25.6
-1.6	Other non-cash items charged to the net surplus or deficit on the provision of services	-0.5
154.9	Total	33.6

The cash flows for operating activities include the following items:

31 March 2021 £m		31 March 2022 £m
2.1	Interest received	1.7
-16.6	Interest paid	-16.0
0.7	Dividends received	1.1

The surplus or deficit on the provision of services has been adjusted for the following items that are investing and financing activities:

31 March 2021 £m		31 March 2022 £m
-21.7	Proceeds from the sale of property, plant and equipment, investment property and intangible assets	-4.7
-83.2	Any other items for which the cash effects are investing or financing cash flows	-107.2
-104.9	Total	-111.9

Note 22: Cash Flow Statement – investing activities

31 March 2021 £ m	Cash flows from investing activities	31 March 2022 £ m
-78.6	Purchase of property, plant and equipment, investment property and intangible assets	-83.7
-138.0	Purchase (-) of short-term and long-term investments	-260.0
90.0	Proceeds of short-term and long-term investments	158.0
-1.8	Other receipts or payments (-) for investing activities	-0.4
23.9	Proceeds from the sale of property, plant and equipment, investment property and intangible assets	9.7
79.1	Other receipts from investing activities - capital grants	136.2
-25.3	Net cash flows from investing activities	-40.2

Note 23: Cash Flow Statement – financing activities

31 March 2021 £ m	Cash flows from financing activities	31 March 2022 £ m
-20.0	Repayments of short and long term borrowing	0.0
-20.0	Net cash flows from financing activities	0.0

There were no financing activities in 2021/22. In 2020/21 the only cash flow in relation to borrowing was the repayment of £20.0 million of loans outstanding.

Note 24: Grant Income

We credited the following grants to the CIES in 2021/22:

2020/21 £ m	Grant income	2021/22 £ m
	Revenue grants credited to Services:	
233.2	Dedicated Schools Grant	239.9
9.6	Pupil Premium Grant	9.6
0.1	Sixth Form Funding	0.0
13.7	Other Schools Grants	3.5
4.3	Asylum Seekers Grant	6.6
23.4	Public Health Grant	23.9
4.7	Universal Infant Free School Meals	4.0
1.6	Adult & Community Learning	1.8
14.5	Contain Outbreak Management Covid Grant	2.8
7.8	Hospital Discharge Grant	3.1
1.9	Winter Grant Fund	0.0
5.6	Covid Test and Trace, Community Testing & ASC Rapid Testing Grants	1.9
13.4	Covid Infection Control Grant	10.0
14.7	Better Care Fund	14.5
0.0	Community Renewal Fund	1.6
0.0	Household Support Grant	3.5
1.1	Workforce Recruitment & Retention Grant	3.9
0.9	Covid 19- Catch up Grant	1.1
0.7	Bus Service Operators Grant	1.7
0.1	Holiday Activities and Food Programme	1.2
4.4	Other revenue grants	4.7
355.7	Total revenue grants	339.3
	Capital grants and contributions credited to services:	
5.1	Disabled Facilities Grant	5.1
0.0	Environment Agency	0.1
2.3	Building Digital UK (BDUK)	5.2
7.1	Private developer funding	8.3
2.3	Other grants/contributions	1.9
16.8	Total capital grants and contributions	20.6
372.5	Total	359.9

2020/21 £ m	Grant income	2021/22 £ m
	Revenue grants credited to Taxation and Non Specific Grant Income:	
9.6	Business Rates Retention/Compensation Scheme	10.7
0.0	Council Tax Support Scheme	4.9
26.4	Adult Social Care & Better Care Fund	27.0
0.0	Domestic Abuse Support Grant	1.0
31.6	Covid 19 Support Grants	10.8
3.4	New Homes Bonus	2.7
1.8	Independent Living Fund Grant	1.8
1.3	Tackling Troubled Families	1.1
1.0	Childrens Social Innovation Programme	1.0
1.2	Fire Service Pensions Grant	1.3
3.7	Fire Pension Fund Grant	6.3
2.5	Other Grants	2.4
82.4	Total revenue grants	71.0
	Capital grants and contributions credited to Taxation and Non Specific Grant Income:	
1.2	Devolved Formula Capital	1.3
5.6	Schools Maintenance and Basic Need	32.3
26.6	Local Transport Plan and other transport grants	20.3
4.9	Contribution from other local authorities	5.6
15.3	Private developer funding	20.1
0.0	Donated assets received	1.4
12.8	Other grants/contributions	7.0
66.4	Total capital grants and contributions	88.0
148.9	Total	159.0

We have received a number of grants, contributions and donations that have yet to be recognised as income as they have conditions attached to them that will require the monies or property to be returned to the giver.

The balances at year end are as follows:

31 March 2021 £ m		31 March 2022 £ m
	Short-term grant receipts in advance - revenue	
1.0	Rural Mobility Fund	1.0
0.7	Syrian Settlement Grant	1.1
0.9	Other grants	3.0
2.7	Total revenue grants	5.1
	Long-term grant receipts in advance - capital	
1.0	Devolved Formula Capital	0.8
6.2	Grant from Other Local Authorities	9.3
0.7	Additional School Capital Funding	0.5
66.5	Private developer funding and capital receipt deposits	87.9
1.3	Other grants/contributions	4.1
75.7	Total capital grants	102.6
78.4	Total	107.7

Note 25: Accounting standards issued that have not yet been adopted

The following accounting standards have been issued but not yet adopted:

- Annual improvements to IFRS Standards 2018-2020. The annual IFRS improvement programme notes 4 changed standards:
 - IFRS 1 (First-time adoption)
 - IAS 37 (Onerous contracts)
 - IFRS 16 (Leases)
 - IAS 41 (Agriculture)
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16)

These standards all apply to local authority accounts in 2022/23 but are not expected to have a material effect on the authority's financial statements.

Note 26: Assumptions made about the future and other major sources of estimation uncertainty

The Statement of Accounts contains estimated figures that are based on assumptions we have made about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in our Balance Sheet at 31 March 2022 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

Item	Uncertainties	Effect if actual results differ from assumptions
Property, plant and equipment	Assets are depreciated over useful lives that are dependent on assumptions about the level of repairs and maintenance in relation to individual assets. In the current economic climate, the authority cannot be certain about its ability to sustain the current level of spending on repairs and maintenance bringing into doubt the useful lives of the assets.	If a reduction of asset life occurs, the depreciation increases and the carrying amount of the asset falls. It is estimated that the annual depreciation charge for property, plant and equipment would increase by £3.0 million for every year that useful lives are reduced.
Pensions liability	Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the authority with expert advice about the assumptions to be applied.	The effects on the net pension liability of changes in individual assumptions can be measured. For instance, a 0.1% decrease in the discount rate, in isolation, would result in an increase in the pension liability of £38.7 million. See note 37 for further examples. During 2021/22, our actuaries advised that the net pensions' liability has decreased by £161.7 million mainly as a result of an actuarial gain due to revaluation of fund liabilities.
McCloud and Sargeant Judgements	The McCloud and Sargeant judgements upheld the claimant's cases that the method of implementation of the new public sector pension schemes discriminated against younger members. Our consulting actuaries have included an estimate of the impact in the calculation of our pension liability. However, the remedy to resolve the age discrimination has yet to be agreed and the financial impact remains uncertain.	A 1% change in the employer's liability as a result of the final remedy would change our pension liabilities by £23m.

Item	Uncertainties	Effect if actual results differ from assumptions
Covid-19	<p>Our immediate response to the Covid-19 pandemic, the impact of lock down and social distancing on service provision, the wider effects on the economy locally, nationally and globally and the need to invest in the reinstatement of services and recovery began to impact towards the end of March 2020.</p> <p>We used expert external valuers and actuaries to value of our assets and liabilities as at the end of March 2021 and March 2022 to ensure our balance sheet reflects the estimated impact at that point. However, the duration of the pandemic and the depth of and timeframe for recovery from any economic downturn remain uncertain. Therefore, the financial impact and risk of a material adjustment to our balance sheet going forward remains.</p> <p>The key elements that could be negatively impacted include:</p> <ul style="list-style-type: none"> • The fair value of our assets and investments; and • The level of reserves and cash we use compared to our plans to meet any unfunded costs as well as an increase in both demand for our services and a reduced resource base in future years. 	<p>We have £255.6m of general fund revenue reserves and £473.7m of cash and short-term investments at 31 March 2022. A significant proportion of these could be used/redirected to meet any immediate funding shortfall. Any material use would require a review of our medium-term spending and investment plans.</p> <p>Our long-term investments and investment property equate to 1.4% of our total long-term assets at 31 March 2022. A decrease in value of these assets will not affect the underlying strength of our asset base.</p> <p>£138.6m of our operational land and buildings assets are valued on the basis of their existing use. A 12%+ variation in the value of these assets would have a material impact on our accounts.</p>
Inflation	<p>We are facing material inflationary increases for the first time in decades. The key elements that could be negatively impacted include:</p> <ul style="list-style-type: none"> • The fair value of our assets and investments – through the impact in the value of our investments and the increased cost of delivering new investments/assets impacting on the amount of investment we can undertake; • The level of reserves we use compared to our plans to meet any increased costs and/or demand for our services compared to our plans; and • The net pensions liability through the impact on both the estimation of liabilities and the expected return on pension fund assets. A firm of consulting actuaries is engaged to provide the authority with expert advice about the assumptions to be applied. 	<p>We have £255.6m of general fund revenue reserves and £473.7m of cash and short-term investments at 31 March 2022. A significant proportion of these could be used/redirected to meet any immediate funding shortfall. Any material use would require a review of our medium-term spending and investment plans.</p> <p>Our long-term investments and investment property equate to 1.4% of our total long-term assets at 31 March 2022. A decrease in value of these assets will not affect the underlying strength of our asset base.</p> <p>£138.6m of our operational land and buildings assets are valued on the basis of their existing use. A 12%+ variation in the value of these assets would have a material impact on our accounts.</p> <p>The effects on the net pension liability of changes in individual assumptions can be measured. See note 37 for further examples. A 1% variation in the fair value of our share of the Pension Fund's assets is £14.0m.</p>

Item	Uncertainties	Effect if actual results differ from assumptions
Fair Value	<p>It is not always possible for the fair values of investment properties, surplus assets and assets held for sale to be measured based on quoted prices in active markets (i.e. Level 1 inputs).</p> <p>For Level 2 inputs we use quoted prices for similar assets or liabilities in active markets at the balance sheet date.</p> <p>Where possible the inputs to these valuation techniques are based on observable data, but where this is not possible, judgement is required in establishing fair values.</p> <p>Where Level 1 inputs are not available, we use valuers to identify the most appropriate valuation techniques to determine fair value.</p>	We use a combination of indexation techniques, beacon valuations and discounted cash flow models to measure the value of our investment properties, surplus assets and assets held for sale.

Note 27: Capital expenditure and capital financing

The total amount of capital expenditure incurred in the year is shown in the table below, together with the resources that have been used to finance it. Where capital expenditure is to be financed from borrowing (resulting in future revenue charges), the expenditure results in an increase in the Capital Financing Requirement (CFR), a measure of the capital expenditure incurred historically yet to be financed. The CFR is analysed in the second part of this note.

2020/21 £ m	Capital financing requirement	2021/22 £ m
289.8	Opening requirement	278.3
	Capital investment:	
78.9	- Property, plant & equipment	86.4
0.0	- Heritage assets	0.1
0.2	- Intangible assets	0.0
0.0	- Long term debtors relating to capital transactions	0.4
20.8	- Revenue spending from capital under statute	22.1
99.9	Total capital investment	109.0
	Sources of finance:	
-15.0	- Capital receipts	-23.9
-83.0	- Government grants and other contributions	-82.6
	- Sums set aside from revenue:	
-2.0	- Direct revenue contributions	-2.5
-11.4	- MRP	-10.9
-111.4	Total sources of income	-119.9
278.3	Closing capital financing requirement	267.4

2020/21 £ m	Explanation of movements in the year	2021/22 £ m
-11.5	Change in underlying need to borrow	-10.9
-11.5	Increase/decrease(-) in Capital Financing Requirement	-10.9

Note 28: Critical judgements in applying accounting policies

In applying our accounting policies as set out at the start of this document, we have had to make certain judgements about complex transactions or those involving uncertainty about future events. The critical judgements made in the Statement of Accounts are:

- There is a high degree of uncertainty about future levels of funding for local government. However, we have determined that this uncertainty is not yet sufficient to provide an indication that our assets might be impaired as a result of a need to close facilities and reduce levels of service provision;
- We consider voluntary controlled, voluntary aided and foundation schools contribute alongside maintained schools, to meeting our service objectives both now and in the future and that therefore their expenditure, income and the assets they use in the provision of services should form part of our accounts. In accordance with the Code we include them in our single entity accounts, and we do not have to prepare separate group accounts. Details of the value and number of each type of school included in our accounts are shown at note 9;
- When a school that is held on our Balance Sheet transfers to academy status we account for this as a disposal for nil consideration on the date that the school converts to academy status rather than as an impairment on the date that approval to transfer to Academy status is agreed. See Notes 4 and 30.
- Details of our relationships with other companies and investments in companies are detailed in note 40. These are not material and we have not prepared group accounts on this basis.
- When we become aware of an expected credit loss our accounting policies require that, if material, we charge this to the CIES in the year. Our judgement, based on the advice of our external experts, is that there is no material expected credit loss at 31 March 2022 and therefore no impairment charge to the CIES has been made.

Note 29: Dedicated Schools Grant

Our spending on schools is funded primarily by a grant provided by the Education and Skills Funding Agency, the Dedicated Schools Grant (DSG). DSG is ring fenced and can only be applied to meet expenditure properly included in the Schools Budget as defined in the School Finance and Early Years (England) Regulations 2017. The Schools Budget includes elements for a range of educational services provided on an authority-wide basis and for the Individual Schools Budget, which is divided into a budget share for each maintained school.

Central spending includes other funding allocated as school specific contingencies and nominally held funds and allocations by the School Forum. The DSG figure is as confirmed by the Department for Education in March 2022.

We confirm that the DSG receivable in 2021/22 was £240.0 million (made under section 14 of the Education Act 2002). It has been fully distributed to support schools' budgets, as set out in the regulations made under sections 45A, 45AA, 47, 47ZA, 47A, 48, 49 and 138(7) of, and paragraph 2(B) of schedule 14 to, the Schools Standards and Framework Act 1998 and section 24(3) of the Education Act 2002.

New provisions, which came into force on 1 April 2020, under the Schools and Early Years Finance (England) Regulations 2020, mean that local authorities are required to carry forward overspends of DSG to their schools' budgets either in the year immediately following or the year after. Under Regulation 8, paragraphs (7) and (8) this also applies to a deficit from the previous year i.e. 2020/21, thus creating a comparable position to the statutory funding basis for the 2021/22 financial year. Any future funding to make good any deficit from our General Reserves can only be made upon approval from the Secretary of State. This reflects the statutory requirement that a deficit must be carried forward to be funded from future DSG income, unless the Secretary of State authorise the local authority not to do so. Furthermore, the DSG deficit has to be allocated between service categories so that a deficit from one service category cannot be offset against a surplus from another.

The early years DSG is based on data from earlier years. The final allocation will be determined and received during 2022/23 and will be shown in the table as an in-year adjustment. The £0.5m in-year adjustment shown in the table is £0.5m additional DSG income relating to the final in-year adjustment for 2020/21 and £0.04m estimated to be clawed back as the additional final early years DSG for 2021/22.

The deficit on the high needs DSG is £16.0m at the end of the 2021/22 financial year. This will be recovered through future funding growth and our recovery plan aimed at influencing the increasing level of demand in the high needs system and the push towards specialist placements. In line with new regulations which came into force on 29 November 2020, any deficit, as calculated under those regulations, must not be charged to the revenue account. That deficit should be recorded in a separate account solely for the purposes of recording deficits relating to its schools' budget. This is an unusable reserve which we have called the Dedicated School Grant Adjustment Account. These regulations apply at the moment for a period of three years. This adjustment is included as a statutory adjustment in Note 2 to ensure it does not affect the Net Cost of Services or the Total General Reserves available.

Details of the deployment of DSG receivable for 2021/22 across the different DSG blocks are shown below.

2020/21 Total		2021/22										
		Central Spending					Individual schools budget (ISB)

Note: The above table contains casting differences of £0.1m due to the rounding applied.

Note 30: Events after the Balance Sheet dateAcademisation of Schools

As a result of the Government's White Paper 'The Importance of Teaching', which allows Schools to opt out of local government control by becoming academies, 8 Warwickshire schools chose to take up the new academy status in 2021/22 and a further 13 Warwickshire schools are anticipated to also convert to academy status in 2022/23 and beyond. The significance of the conversion of these schools to academy is that the value of the land, buildings and any vehicles, plant and equipment will be removed from our Balance Sheet at the date of conversion. The value of the derecognition of the current schools looking to convert to academy status after 31 March 2022 will be in the region of £39.6 million.

Note 31: External audit costs

We expect to incur costs of £0.123 million (£0.115 million in 2020/21) in relation to the audit of the 2021/22 Statement of Accounts and £0.008 million (£0.005 million in 2020/21) in respect of certification of grant claims and other services provided by our external auditors. In addition, we acquired non-audit services from the external auditors of £0.008 million in 2021/22 (£0.010 million in 2020/21).

Note 32: Leases**Authority as lessee**

- Finance leases
We have acquired some equipment under finance leases. The assets acquired under these leases are carried as property, plant and equipment in the Balance Sheet. These amounts are not material to the financial statements.
- Operating leases
We have acquired a number of buildings, vehicles and items of equipment by entering into operating leases. These amounts are not material to the financial statements.

Authority as lessor

- Finance leases
We do not have any finance leases as lessor.
- Operating leases
We lease out property under operating leases for the following purposes:
 - For the provision of community services, such as community centres, homes for the elderly and disabled nurseries;
 - For economic development purposes to provide accommodation for local businesses;
 - For the support of rural businesses to support smallholdings and farming; and
 - To individuals for personal and business use.

The future minimum lease payments receivable under non-cancellable leases in future years are:

31 March 2021 £ m	Operating lease period	31 March 2022 £ m
1.3	Not later than 1 year	1.8
3.3	Later than 1 year and not later than 5 years	4.8
9.6	Later than 5 years	11.0
14.2	Total	17.6

The minimum lease payments receivable do not include rents that are contingent on events taking place after the lease was entered into, such as adjustments following rent reviews. The contingent rent is not material to the financial statements.

Note 33: Contingent assets

We currently have no contingent assets.

Note 34: Contingent liabilities

A further legal ruling relating to Firefighter Additional Duties received in April 2019 charges Fire Authorities to ensure all allowances related to any regular additional duty are treated as pensionable. The appropriate changes have been made to the payroll system but backpay will be due once further advice is received concerning how far back we are required to consider recompense for. Until this advice is available, we are unable to calculate an appropriate provision amount, but our view is that for Warwickshire FRS this only relates to Training Allowance which is only paid to a small number of individuals and therefore should not be a material amount.

Note 35: Members' allowances

Elected members were paid a total of £0.775 million (£0.756 million in 2020/21) in allowances and expenses. In addition, we paid independent and co-opted members allowances and expenses of £0.013 million (£0.013 million in 2020/21). No single member was paid more than £50,000 during the year. Further details of allowances and expenses payments made to Elected Members in 2021/22 are available on our website <https://www.warwickshire.gov.uk>. Payments to Elected Members include expenses for the Police and Crime Panel which are reimbursed by the Home Office.

Note 36: Officers' remuneration and termination benefits

We are required to show the number of our staff who are paid more than £50,000 a year. This is shown in the table below. Pay includes salary, redundancy, taxable travel and other taxable costs. These figures do not include employer's pension contribution and exclude remuneration for senior staff who are shown separately.

2020/21		Remuneration Band	2021/22	
Number of Staff	Number Left in the Year		Number of Staff	Number Left in the Year
138	1	£50,000 - £54,999	170	7
120	0	£55,000 - £59,999	113	5
66	3	£60,000 - £64,999	83	1
50	2	£65,000 - £69,999	64	2

Note 1 The Strategic Director for People holds the posts of Director of Children's Services and Director of Adult Social Services.

Note 2 The role of the Chief Fire Officer was undertaken by two individuals during 2021/22. Initially from 1 April 2021 to 1 September 2021 on an annualised salary of £132,228. A new Chief Fire Officer started on 26 July 2021 on an annualised salary of £130,000. The new Chief Fire Officer was previously in the role of Assistant Chief Fire Officer.

Note 3 An interim Assistant Director for Education was also in post from November 2021 to March 2022. They were paid via an Agency. Payments for 2021/22 were £68,255.

There were no payments for compensation for loss of office or benefits in kind relating to senior staff.

A number of employees left during 2021/22, incurring costs of £1.8 million (£2.1 million in 2020/21). None of this relates to senior staff. This cost includes officers who have left as part of ongoing savings and efficiency plans. The table below provides details of total exit costs, which also includes the pensions costs funded by the authority.

Exit Package Cost Band (including Special Payments)	Number of compulsory redundancies		Number of other departures agreed		Total Number of packages by cost band		Total cost of packages in each band £ m	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22

	21	50	74	35	95	85	2.131	1.806

This is staff that have left the authority in the year. In addition, we are required to account for the termination costs for staff that have signed an agreement to leave the authority which cannot be cancelled but who do not leave until after the 31 March, as a provision charged in the CIES.

Note 37: Pension schemes

As part of the terms and conditions of employment, we offer retirement benefits. Although these benefits will not actually be payable until employees retire, the authority has a commitment to make payments that need to be disclosed at the time that employees earn their future entitlement.

Pension Schemes operated by the Council

Teachers

We operate a pension scheme for our teaching staff, under the Superannuation Act 1972. The scheme provides teachers with a defined benefit when they retire. The Teachers' Pensions Agency manages the scheme under the Teachers' Pensions Regulations 1997, as amended. The Government sets teachers' and employers' contribution rates on the basis of an assumed fund. The scheme has a large number of participating employers and so we are not able to identify our share of the underlying financial position and performance of the scheme with sufficient reliability for accounting purposes. For the purposes of our Statement of Accounts, the scheme is therefore accounted for on the same basis as a defined contribution scheme.

We may be required to make two kinds of contributions to the scheme – 'normal' and 'supplementary'. The normal contribution is the percentage of a newly recruited teacher's salary that is needed to meet the cost of the pension liability. We would pay a supplementary contribution if the Government found that future liabilities would not be met by the normal contributions. A supplementary contribution is not needed at present. Our total employer's contribution cost was £16.4 million in 2021/22 (£17.0 million in 2020/21).

We are also responsible for paying any extra added years of benefits and early retirement costs to pensioners. These extra costs are classed as defined benefits. As a result, in our accounts we show the extra cost of pensions decisions we made in the current year, no matter when we will actually pay these financial costs. There is no fund for these discretionary benefits and so there are no assets. In 2021/22 the payments relating to added pensionable years came to £3.1 million (£3.2 million in 2020/21).

Firefighters

There is a defined benefit pension scheme for our firefighters, under the Superannuation Act 1972. The Firefighters' Pension Scheme in England is an unfunded scheme where we promise to provide employees with benefits under the scheme but make no advance funding in the scheme for those benefits. Benefits are paid directly when they become due.

We pay an employer's pension contribution, based on a percentage of pay, into the pension fund. The pension fund will be balanced to nil at the end of the year by either paying over to the government any excess, or by receiving cash in the form of pension top-up grant. This grant is paid to the Firefighters' Pension Fund and not the County Council. The Government sets the employees' and employer's contribution rates by regulation.

In 2021/22, pension payments totalled £7.3 million (£7.0 million in 2020/21). Costs relating to early retirement totalled £3.2 million in 2021/22 (£0.7 million in 2020/21).

The estimated employer's contributions for Fire Fighters pension for the period to 31st March 2023 is approximately £2.8 million.

Firefighters' Injury Awards Scheme

Firefighters' injury awards are financed from our revenue account. An ongoing liability to pay injury awards is included in our Balance Sheet. This liability is subject to the same actuarial assumptions as the main firefighters' scheme, though it is not a separate pension scheme as there is a benefit paid whether the recipient of the injury award is a member of the scheme or not. However, the liability forms part of our overall pensions' liability.

National Health Service

During 2013/14 some NHS staff transferred to us. These staff have maintained their membership in the NHS Pension Scheme. The scheme provides these staff with specified benefits upon their retirement and we contribute towards the costs by making contributions based on a percentage of members' pensionable salaries.

The scheme is an unfunded defined benefit scheme. However, we are not able to identify our share of the underlying financial position and performance of the Scheme with sufficient reliability for accounting purposes. For the purposes of this Statement of Accounts it is therefore accounted for on the same basis as a defined contribution scheme.

In 2021/22 we paid £0.065 million (£0.070 million in 2020/21) to the NHS Pension Scheme in respect of former NHS staff retirement benefits, including employees' contributions.

Local Government Pension Scheme – all other Council employees

We operate a funded, defined benefit pension scheme for staff, under the Local Government Pensions Scheme Regulations 2013. We manage the scheme for ourselves, the five district councils and a number of other organisations. We prepare the accounts, but they are separate from our financial statements. The Council and employees pay contributions into the fund calculated at a level intended to balance pension liabilities with investment assets.

An actuarial valuation is carried out every three years to assess the difference between the fund's projected assets and liabilities and the amount employers will have to contribute for the next three years. The valuation on 31 March 2019 set the rates for 2020/21, 2021/22 and 2022/23.

In the valuation carried out as at 31 March 2019 the funding level increased from 82% to 92%. As a result, the employer's rate is expected to increase by 0.75% per annum until 2022/23. In 2021/22, we made normal employer's contributions totalling £32.3 million (£28.7 million in 2020/21).

We are also responsible for all pension payments relating to benefits we have awarded for added years, together with related increases. In 2021/22, these came to £1.1 million (£2.5 million in 2020/21). The estimated employer's contribution for the period to 31st March 2023 is £33.2 million.

In 2021/22 we agreed to take on the full pension assets and liabilities of Educaterers Ltd (our wholly owned Local Authority Trading Company), adopting an approach to achieve a stable and appropriate contributions rate under a risk sharing agreement. This is identified within the below tables with the narrative "Effect of business combinations and disposals". The net impact is an increased pension liability of £10 million. This comprises of an increase in LGPS assets of £19.2 million and an increase in LGPS liabilities of £29.1m. The liability was previously transferred from us in 2017 on the incorporation of Educaterers.

The impact of the transfer is included within Other Comprehensive Income in the CIES included within the line for "Remeasurements of the net defined benefit liability". There is no impact to our general fund reserves, with the increase in pension liability offset by an increase in the pension reserve.

The value of our LGPS assets at 31 March 2022 is based on the market value at 31 March 2022. The movement in our LGPS assets in the year is as shown below:

31 March 2021 £ m	Change in Fair Value of WCC Share of LGPS Assets	31 March 2022 £ m
1,019.2	Fair value of assets at the beginning of the year	1,278.1
-4.9	Effect of settlements	-2.7
23.3	Interest Income on plan assets	25.5
242.2	Remeasurements on assets	77.9
32.0	Employers' contributions (including receipts covering early retirements)	32.4
9.3	Member contributions	10.1
-43.0	Benefits/transfers paid	-43.3
0.0	Effect of business combinations and disposals	19.2
1,278.1	Fair value of assets at the end of the year	1,397.2

A breakdown of the nature of those assets is as follows:

31 March 2021		LGPS Assets	31 March 2022	
Quoted prices in active markets £ m	Quoted prices not in active markets £ m		Quoted prices in active markets £ m	Quoted prices not in active markets £ m
0.0	0.6	Equity securities:	0.0	0.6
277.0	43.1	Debt Securities:	180.5	41.6
0.0	65.5	Private equity:	0.0	99.3
		Real estate:		
116.0	0.0	UK property	137.1	0.0
0.0	0.0	Overseas property	0.5	0.0
		Investment funds and unit trusts:		
714.2	0.0	Equities	711.3	0.0
0.0	0.0	Bonds	126.2	0.0
36.9	0.0	Infrastructure	0.0	70.7
0.0	0.0	Other	0.0	0.0
24.8	0.0	Cash and cash equivalents	29.3	0.0
1,168.9	109.2	Totals	1,185.0	212.2

Note: The above table contains a casting difference of £0.1m due to the rounding applied.

The expected return on scheme assets does not affect the Balance Sheet position as at 31 March 2022 but will affect the reported pension cost for the following year. It is based on market expectations at the beginning of the financial period for returns over the life of the obligation. This requires the consideration of the composition of the Scheme's assets and the potential returns of different asset classes. The assumption used is the average of the assumptions appropriate to the individual asset classes weighted by the proportion of the assets in the particular asset class.

The Impact of Pensions in our Accounts

We show the cost of retirements benefits in 'Money spent on services' in the CIES when employees earn them. We have made adjustments in the MIRS so that the charge made against the council tax reflects the actual cash we have paid relating to the year.

Section B - Page 65

The key assumptions used by our actuary to determine valuations are as laid out in the table below:

31 March 2021				Pension scheme assumptions	31 March 2022			
LGPS	Teachers	Firefighters	Firefighter Injury Award		LGPS	Teachers	New Firefighters	Firefighter and Injury Award
				Financial assumptions:				
2.9%	2.9%	2.9%	2.9%	Rate of Inflation CPI	3.2%	3.2%	3.2%	3.2%
3.1%	3.1%	3.3%	3.3%	Salary increase	4.0%	4.0%	3.7%	3.7%
2.9%	2.9%	2.9%	2.9%	Pensions increases	3.2%	3.2%	3.2%	3.2%
2.0%	2.0%	2.0%	2.0%	Rate of discount	2.7%	2.7%	2.7%	2.0%
				Life expectancy assumptions:				
21.8 (24.2)	21.8 (24.2)	26.6 (28.9)	26.6 (28.9)	A male (female) current pensioner aged 65	21.6 (24.1)	21.6 (24.1)	26.3 (28.7)	26.3 (28.7)
23.0 (26.1)	23.0 (26.1)	27.9 (30.3)	27.9 (30.3)	A male (female) future pensioner aged 65 in 20 years time	22.7 (25.9)	22.7 (25.9)	27.7 (30.1)	27.7 (30.1)
				Commutation of pension for lump sum at retirement:				
75.0%	n/a	90.0%	90.0%	~ Taking maximum cash	75.0%	n/a	90.0%	90.0%
50.0%	n/a	n/a	n/a	~ Taking 3/80th cash	50.0%	n/a	n/a	n/a

The sensitivity regarding the principal assumptions used to measure the LGPS scheme liabilities are set out below.

Change in assumptions as at 31 March 2022	Approximate increase to Employer Liability %	Approximate monetary amount £ m
0.1% decrease in real discount rate	2%	38.7
1 year increase in member life expectancy	4%	77.2
0.1% increase in the salary increase rate	0%	3.3
0.1% increase in the pension increase rate	2%	35.0

Section B - Page 66

The liabilities associated with each scheme are as shown in the table below:

31 March 2021					Change in present value of pension scheme liabilities during the year	31 March 2022				
LGPS £m	Teachers £m	Firefighters £m	Firefighter Injury Award £m	All Schemes £m		LGPS £m	Teachers £m	Firefighters £m	Firefighter Injury Award £m	All Schemes £m
1,506.2	44.7	256.6	24.3	1,831.8	Benefit obligation at the beginning of the year	1,949.1	47.8	316.3	27.7	2,340.9
49.6	0.0	3.3	0.4	53.3	Current service costs	81.3	0.0	5.0	0.6	86.9
-8.4	0.0	0.0	0.0	-8.4	Effect of Settlements	-5.3	0.0	0.0	0.0	-5.3
34.6	1.0	5.8	0.6	42.0	Interest on pensions liabilities	39.3	0.9	6.2	0.6	47.0
9.3	0.0	1.2	0.0	10.5	Member contributions	10.1	0.0	1.2	0.0	11.3
0.0	0.0	0.0	0.0	0.0	Past service costs	0.3	0.0	0.0	0.0	0.3
-43.0	-3.2	-7.7	-0.6	-54.6	Benefits/transfers paid	-44.3	-3.1	-10.3	-0.5	-58.2
0.0	0.0	0.0	0.0	0.0	Effect of business combinations and disposals	29.1	0.0	0.0	0.0	29.1
400.7	5.4	57.1	3.0	466.2	Remeasurements on liabilities	-129.2	-2.1	-20.4	-2.2	-153.9
1,949.1	47.8	316.3	27.7	2,340.9	Present value of liabilities at the end of the year	1,930.4	43.6	298.0	26.2	2,298.2

Note: The above table contains casting differences of £0.1m due to the rounding applied.

This leaves each scheme with a net liability as shown below:

31 March 2021					Pension assets and liabilities recognised in the Balance Sheet	31 March 2022				
LGPS £m	Teachers £m	Fire fighters £m	Firefighter Injury Award £m	Total £m		LGPS £m	Teachers £m	Fire fighters £m	Firefighter Injury Award £m	Total £m
1,949.1	47.8	316.3	27.7	2,340.9	Present value of the defined benefit obligation	1,930.4	43.6	298.0	26.2	2,298.2
1,278.1	0.0	0.0	0.0	1,278.1	Less: Fair value of plan assets	1,397.2	0.0	0.0	0.0	1,397.2
671.0	47.8	316.3	27.7	1,062.8	Net Liability arising from defined benefit obligation charge to CIES	533.2	43.6	298.0	26.2	901.1
184.0	3.1	59.7	3.4	250.2	Increase/decrease (-) in net liability from previous year	-137.7	-4.2	-18.3	-1.5	-161.8

Note: The above table contains casting differences of £0.1m due to the rounding applied.

The liabilities show the underlying commitments that we have in the long run to pay retirement benefits. However, statutory arrangements for funding the deficit mean that our financial position remains healthy:

- LGPS - the deficit will be recovered by increased contributions over the remaining working life of employees, as assessed by the scheme actuary;
- Firefighters Pension Scheme - the deficit is paid by Central Government;
- Teachers' Pension Scheme - finance is provided by the Teachers Pensions Agency; and
- Firefighters' Injury Awards – these are financed through revenue budgets.

Note 38: Pooled budgets with health

Section 75 of the National Health Service Act 2006 allowed joint-working arrangements between NHS organisations and local authorities. Pooled funds allow these health organisations and local authorities to work together to tackle specific health issues. An important feature of the pool is that the way resources are used will depend on the needs of the clients who meet the conditions set for the pooled budget, rather than the contributions of the partners.

The table below summarises the financial transactions of the pooled budgets.

2020/21 Surplus(-)/ Deficit £ m	Pooled budgets with health	2021/22			
		Our contribution £ m	Total pool £ m	Total spend £ m	Surplus(-)/ Deficit £ m
	Better Care Fund Pooled Budget - S75				
-0.4	~ Integrated community equipment service	1.7	5.8	5.5	-0.3
-1.0	~ Better Care Fund - revenue other	29.1	58.0	55.1	-2.9
-2.2	~ Disabled Facilities Capital Grant	0.0	5.1	3.7	-1.4
-3.6	Total Better Care Fund	30.8	68.9	64.3	-4.6
0.0	Commissioning of Mental Health Services for Children & Young People	0.9	4.5	4.5	0.0
0.0	Community Dietics Service	0.7	0.7	1.0	0.3
-3.6	Total	32.4	74.1	69.8	-4.3

Warwickshire County Council is the host authority for the Section 75 Pooled budget arrangement via the Better Care Fund. The strategic aims of the programme are:

- People are helped to remain healthy and independent;
- People are empowered to play an active role in managing their own care and the care they receive; and
- People get the right service at the right time and in the right place – which means services will envelop individuals close to their home.

Agreements for the financial years since 1 April 2015 have been agreed by us and the three Clinical Commissioning Groups (CCGs) in Warwickshire. Annual contributions are agreed by the Better Together Programme Board before the commencement of each financial year thereafter. The agreement sets out the basis of the governance arrangements and reporting requirements to both the Better Together Programme Board and the Health and Wellbeing Board.

The total pooled budget arrangement for 2021/22 is £68.9 million (£64.8 million in 2020/21) of which £5.1 million (£5.2 million in 2020/21) is capital funding for Disabled Facilities. Of the revenue element £33.0 million (£29.6 million in 2020/21) is held by the CCGs for them to commission services and of that £4.1 million (£3.9 million in 2020/21) has been passed back to the authority as part of a separate S75 Integrated Community Equipment Service agreement. A total of £30.8 million (£30.1 million in 2020/21) revenue funding was allocated by the council for commissioning services in accordance with the agreement.

The surplus and deficit at the end of the year on the Integrated Community Equipment Service and Better Care Fund Revenue respectively belong to the CCGs. The surplus at the end of the year on Disabled Facilities belongs to the District and Borough Councils of Warwickshire.

The S75 agreement for the Commissioning of Mental Health Services was agreed in 2018/19. The pooled resources total £4.5 million (£4.9 million in 2020/21) with any surplus or deficits remaining within the pool, to be allocated by agreement with the Partnership Board.

Note 39: Coventry and Warwickshire Business Rates Pool

The Coventry and Warwickshire Business Rates Pool was created on 1 April 2013 with seven member authorities: Warwickshire County Council, the five District and Borough Councils within Warwickshire and Coventry City Council. Warwickshire County Council is the lead authority for the pool and there is an agreed memorandum of understanding in place that determines how the Pool's resources are allocated. Under the agreement any surplus generated by the pool, will be shared between pool members. We have accounted for our share of the current surplus in the CIES and the pool surplus is held in our reserves until such times as it is distributed (note 7).

Note 40: Related parties and associated parties

Central Government

Central Government has effective control over our general duties – it is responsible for providing the legal framework within which we work, provides funding in the form of grants and sets the terms of many of the relationships that we have with other organisations. Details of the grants we receive from government departments are set out in note 24. Details of the balances with central government departments are shown in notes 15 and 17. Pooled budget arrangements with the Department of Health via Clinical Commissioning Groups are disclosed in note 38.

Elected Members

Elected Members of the council have direct control over our financial and operating policies. The total of Elected Members' allowances paid in 2021/22 is shown in note 35.

During 2021/22 £14.5 million (£26.9 million in 2020/21) was paid to entities in which elected members had an interest (this includes £13.5 million (£17.1 million in 2020/21) paid to District and Borough Councils in Warwickshire where they are also elected members).

During 2021/22 £7.0 million (£8.1 million in 2020/21) was received from entities in which elected members had an interest (this includes £5.4 million (£3.9 million in 2020/21) paid by District and Borough Councils in Warwickshire where they are also elected members).

Amounts owed to or by these councils are included in within the other public bodies figures disclosed elsewhere in this note. At 31 March 2022, no material amounts were owed to or by other entities in which elected members had an interest. Contracts were entered into in full compliance with our contract standing orders. The above figure includes any grants paid to voluntary groups in which elected members had positions on the governing body, including any made to organisations whose senior management included close members of the families of elected members. In all instances, grants were made with proper consideration of declarations of interest. The relevant members did not take part in any discussions or decisions relating to the grants. Details of all these transactions are recorded in the Register of Members' Interests, open to public inspection at Shire Hall. Details of the Members and the Committees and organisations for which they represent the authority are also available on the authority's website www.warwickshire.gov.uk.

Senior Officers

During 2021/22 payments of £0.7 million (2020/21 – £1.7 million) were made to organisations in which senior officers or members of their families had declared an interest. During 2021/22 payments of £1.6 million (2020/21 - £0) were received from organisations in which senior officers or members of their families had declared an interest. At 31 March 2022, no material amounts were owed to or by other entities in which senior officers or members of their families had declared an interest.

A number of senior officers and elected members represent us on the board of related companies (such as Warwick Technology Park Management Limited, Warwick Technology Park Management No 2 Limited, SCAPE Group Limited, and University of Warwick Science Park Innovation Centre Limited). In addition, a number of officers within the authority are directors of our three wholly owned Local Authority Trading Companies. You can see registers of members' and officers' interests at Shire Hall, Warwick or at the registered office of the company in question if this is not Shire Hall, Warwick.

Other Public Bodies

At the end of the year we owed £32.4 million (£33.5 million in 2020/21) to other local authorities, central government and public bodies including £6.8 million (£5.3 million in 2020/21) to Her Majesty's Revenue and Customs, and they owed us £46.8 million (£42.3 million in 2020/21), including £4.6 million (£3.9 million in 2020/21) from Her Majesty's Revenue and Customs. We charged the Warwickshire County Council Pension Fund £1.7 million (£1.6 million in 2020/21) for carrying out the administration work for the fund (not including payroll-processing costs).

Other Entities

We hold shares in the following companies as at 31 March 2022:

Company	WCC Share holding	Directors
Warwickshire Legal Services Trading Ltd	Wholly owned LATC - £1 ordinary share capital	Two officers appointed as directors
Educaters Ltd	Wholly owned LATC - £1 ordinary share capital + working capital loan interest at market rate	Three officers appointed as directors
Warwickshire Property and Development Group Ltd	Wholly owned LATC - £100 ordinary share capital	One officer currently appointed as director - minimum three directors to be appointed by WCC
University of Warwick Science Park Innovation Centre Limited	19.9% of ordinary share capital. 1/6 voting rights £1,502,500 preference shares	One of six directors is appointed by us
Warwick Technology Park Management Company Limited	4.8% of called up share capital	One officer and one elected member as directors
Warwick Technology Park Management Company (No 2) Limited	0.2% of called up share capital	One officer and one elected member as directors.
Eastern Shire Purchasing Organisation (ESPO)	n/a	Two elected members from each authority on Management Committee
ESPO Trading Ltd - also owns 100% share capital in Eduzone Ltd	16.67% of called up share capital	No Directors appointed by WCC
SCAPE Group Limited	16.7% of the called up share capital	One of the six directors is appointed by us
Coventry and Warwickshire Local Enterprise Partnership Limited	No share capital and liability limited to £1.	Two type 'B' (public sector) directors to be appointed by us
Coventry and Solihull Waste Disposal Company	10,000 ordinary 'C' shares 1 representative on shareholder panel with 1% voting rights and 24% voting rights for matters relating to WCC SLA agreement	No right to appoint to board of Directors. 1% proxy vote unless WCC SLA related.
UK Municipal Bond Agency Plc	120,000 fully paid B shares of £0.01 each 180,000 ordinary shares of £0.01 each	No Directors appointed by WCC

We have two wholly owned local authority trading companies which started trading in 2017/18 and one that was incorporated in March 2021.

Warwickshire Legal Services Trading Ltd started trading on 1 October 2017. It provides legal services to other entities outside the Council and pays the authority for the services of our staff to carry out that work. This company has negligible assets.

Educaters Ltd, providing meals services to schools, started trading on 1 September 2017. Most of the company's trading is with maintained schools in Warwickshire so that expenditure is already included in our CIES. Its accounts for the year to 30 August 2021 showed net liabilities of £8.7 million (£5.9 million for the year to 30 August 2020). This is mainly as a result of an increased pensions liability. Some authority staff transferred to the trading company and we gave a guarantee to pay any amount of employer's contributions due to the Warwickshire Pension Fund in respect of their pension liability if the company ever became insolvent and ceases trading. In 2021/22 we agreed to take on the full pension assets and liabilities of Educaters Ltd (our wholly owned Local Authority Trading Company), adopting an approach to achieve a stable and appropriate contributions rate under a risk sharing agreement. This is shown as an impact of business combinations in our net pension scheme liability (see note 37). We have also agreed a working capital loan of up to £1.8 million as required initially up to 31 August 2022. Interest is charged at a market rate of 5.75% plus the Bank of England Base Rate per annum. At 31 March 2022 the balance on the loan was £1.6 million (£1.8 million at 31 March 2021). No dividends or profit distributions have yet been agreed for the trading periods up to 31 March 2022.

A wholly owned Local Authority Trading company was incorporated on 26 March 2021 called the Warwickshire Property and Development Group Ltd. At 31 March 2022 no assets had transferred to the company. Its accounts for the period ended 31 December 2021 showed an operating loss before tax for the year of £0.4 million. As at 31 March 2022 we had provided a working capital loan of £0.2 million. Interest is charged at a market rate of 3.44% above the UK 3-year gilt rate. In addition to the working capital loan there was an intercompany balance of £0.3 million outstanding at 31 March 2022. The reason for creating Warwickshire Property and Development Group Ltd is to deliver our policy objective of creating jobs and more homes across Warwickshire. The procurement of a joint venture partner to undertake the funding and development of assets is currently underway.

We have assessed these three companies, having due regard to the non-material external turnover of both entities and the potential effect of consolidating them into our financial statements both quantitatively and qualitatively. We have concluded there is no current need to consolidate them into our accounts. It is likely that our property company will have material assets and liabilities by 31 March 2023 and will need to be consolidated into our accounts for that year.

We are part of a purchasing partnership, Eastern Shires Purchasing Organisation (ESPO), with five other local authorities. Each authority is represented on the management committee by two elected members. There are controls in place so that none of our elected members are involved in letting our contracts. We received £0.6 million in dividends from ESPO in 2021/22 (£0.6 million in 2020/21). As part of ESPO's strategic growth plan, ESPO Trading Limited was incorporated on 27 February 2018. We own 100 of the 600 shares for which we paid £100. The company has been set up to be able to trade with organisations outside the public sector customer base. It has also purchased Eduzone Ltd in June 2018 (100 shares) since its incorporation, a company with a strong base in the providing products to the early years sector. We have not received any income in respect of these holdings in the year.

We also received dividends from the University of Warwick Science Park in the year totalling £0.1 million (£0.1 million in 2020/21) and from dividends from SCAPE in the year totalling £0.5 million (£0 in 2020/21). All dividend income received is shown as investment income in note 5.

We are part of the Coventry and Warwickshire Local Enterprise Partnership Limited (the LEP). This company is limited by guarantee and aims to co-ordinate public and private sector partners to develop the economy and increase prosperity. The LEP's four objectives are:

- To drive economic growth;
- To help remove barriers to economic growth;
- To help create high value jobs; and
- To co-ordinate local government co-operation and support.

The LEP also has a role in coordinating elements of government funding for growth, for example the Growing Places Fund.

The Gateway Alliance is a strategic partnership of primary schools in Warwickshire. It was created to provide professional development and school to school support following the reduction of Local Authority improvement services in 2011. The company is limited by guarantee and the members have confirmed that the governing documentation of the company contains the necessary provisions which are required pursuant to the School Company Regulations 2002. Under the regulations, all school companies are required to have a local authority as a supervising authority. Warwickshire is the supervising authority for the Gateway Alliance School Company.

West Midlands Rail Ltd is a company limited by guarantee with a Board of Directors appointed from each of the 14 constituent member authorities and 2 affiliate member authorities for the purpose of providing local democratic strategic guidance for the specification of the new West Midlands rail franchise being let by the Department of Transport during 2017.

We are also a partner in a special company, Pride in Camp Hill Ltd. The company was set up in 2002/03 in partnership with the Homes and Communities Agency and Nuneaton and Bedworth Borough Council to carry out a redevelopment project in Camp Hill. Our initial share was £0.7 million and each partner is committed to funding the running costs of the company in equal shares until it completes its work, which is currently expected to be in 2023.

We are part of the Regional Adoption Agency via a shared service arrangement with Solihull Metropolitan Borough Council, Coventry City Council, Worcestershire County Council and Herefordshire Council. The Regional Adoption Agency is known as Adoption Central England. We have become the host authority to facilitate the operational delivery of the shared service, however governance arrangements ensure that all five authorities retain strategic responsibility for performance delivery and outcomes.

For 2021/22 our contribution was £1.1 million (£1.5 million in 2020/21) and we received £5.1 million (£4.3 million 2020/21) from the other local authorities and fees and charges. The total spend was £6.8 million (£5.7 million in 2020/21) and the overspend of £0.6 million was drawdown from earmarked ACE reserves (from prior year underspends). Therefore, the underspend belonging to the Agency for 2021/22 is £0 million (£0.1 million in 2020/21) and there remains a further £0.3 million in the reserve.

When the agency was created staff were seconded from partner authorities. On 1 October 2019 the staff were TUPEd (see glossary) across to the County Council and are now our employees.

The County Council, as administering authority on behalf of the Warwickshire Pension Fund is a shareholder in Borders to Coast Pension Partnership Limited. Borders to Coast is a wholly owned private limited company registered in England and Wales founded to carry out pension fund asset pooling obligations set out by the Government. The company provides the facility to pool the pension fund investments of eleven local authorities in order to gain the benefits of economies of scale: the concentration of expertise, improved ability to manage down investment costs and the benefits of investing on a larger scale. Each of the eleven local authorities is an equal joint owner of the company through purchase of a £1 class A ordinary share. The authority also owns £909,090 class B ordinary shares but these are not voting shares and do not give entitlement to dividends or other distributions of income.

The Firefighters' Pension Fund

Notes to the Firefighters' Pension Fund statements

Note 1: Fund operations

The Firefighters' Pension Scheme in England is an unfunded scheme. The employer promises to provide employees with benefits under the scheme but makes no advance funding in the scheme for those benefits. Benefits are paid directly by the employer when they become due. We are required to pay an employer's pension contribution based on a percentage of pay into the pension fund. Each Fire and Rescue authority must run a pension fund and the amounts that must be paid into and out of the pension fund are set by regulation. The legislation that controls its operation is the Firefighters' Pension Scheme (Amendment) (England) Order 2006. The benefits payable are pensions to retired firefighters and/or widows/widowers of retired firefighters. The benefits paid and employee and employers contributions are administered through our human resources management system. The scheme has no investment assets.

The pension fund is balanced to nil at the end of the year by either paying over to the sponsoring government department the amount by which the amount receivable by (due to) the fund is more than the amount payable, or by receiving cash in the form of pension top-up grant from the sponsoring department equal to the amount by which the amount payable from (owed by) the pension fund for the year is more than the amount receivable. An amount of 80% of the estimated grant needed each year is paid to the fund by the Government during the year. The balance is only paid once the Pensions statement has been audited by our external auditors and a claim, certified by the authority's S151 officer, is submitted to the Government.

Note 2: Accounting policies

The financial statements are accounted for on an accruals basis. We did not use any estimation techniques in preparing the statements.

For assets and liabilities in the net asset statement the fair value is deemed to be the carrying value as they are both due within one year.

Note 3: Liabilities

The statements do not take account of any liabilities to pay pensions and other benefits after the period end i.e. 31 March 2022. Details of the long-term pension obligations, employees and employer's contribution rates and actuarial assumptions used in the required disclosures in accounts for the Firefighters' Pension Fund are found in note 37 to the accounts.

Note 4: Contribution levels

Employees' and employer's contribution levels are based on percentages of pensionable pay set nationally by the Home Office (previously dealt with by the Department for Communities and Local Government) and are subject to triennial revaluation by the Actuary.

Note 5: AVCs and added years

Additional voluntary contributions are excluded from the accounts of the Pension Fund. However, where members of the scheme have brought added years within the scheme, these will be included in the Fund contributions.

Note 6: Debtors and creditors

The debtors and creditors for both years are amounts due to/from central government (balance of grant due to balance the account to nil). Other debtors and creditors for both years are the amounts due to or from Warwickshire County Council, the administering authority or tax not yet paid to HMRC. This year we have had less grant from the Home Office than we have needed, so they owe us more money. As the Firefighters' Pension Fund does not have its own separate bank account this means that this year, more money has been received by the County fund than paid out and is therefore owed by Warwickshire County Council to the Pension Fund. All amounts are due within 1 year.

Glossary

This section explains some of the more complicated terms that have been used in this document.

Accruals

Cost of goods and services received in the year but not yet paid for, or income earned but not yet received.

Actuarial gain (loss)

For pension assets, actuarial gains or losses happen when the actual return on investments in the pension fund is different from the expected return. For pension liabilities, actuarial gains and losses happen when the actual liability is different from the expected liability. For assumptions, actuarial gains or losses happen as a result of changes to the population or financial assumptions the actuary uses to work out the liability. Liabilities are valued in terms of 'today's money'.

Amortisation

The drop in value of intangible assets as they are used or become out of date.

Asset

An item which is purchased or created to be used by the Council.

Benefits we have awarded for added years

When a member of staff retires early because they are made redundant, we can give added years of scheme membership. We meet the costs of giving these added years, usually from the savings that will be made.

Budget

A statement of our spending plans for a financial year, which starts on 1 April and ends on 31 March.

Business rates (National Non-Domestic Rates)

Businesses pay these rates, set annually by government, to billing authorities instead of council tax. Business rates are shared between local authorities partly on the basis of need and partly on the basis of increased business rates generated locally. The amount each business is charged is based on multiplying the rateable value of each business property by the national rate in the pound.

Capital Adjustment Account

This account includes the value of capital charges to the Comprehensive Income and Expenditure Statement that do not directly affect the level of council tax.

Capital programme

Our plan of capital projects and future spending on buying land, buildings, vehicles and equipment.

Capital receipts

Income from selling assets that we would consider capital expenditure if we were the purchaser.

Capital spending

Spending on assets that have a lasting value, for example, land, buildings and large items of equipment such as computers or vehicles.

CIPFA

Chartered Institute of Public Finance and Accountancy

Contingent asset

A possible asset which may arise pending decisions that are not under our control.

Contingent liability

A possible liability which may arise when we know the outcome of outstanding claims made against us.

Council tax

A tax based on property which is retained by local authorities to fund their expenditure. In Warwickshire, the district or borough councils issue council tax bills and collect the council tax.

Creditors

People or organisations we owe money to for work, goods or services which have not been paid for by the end of the financial year.

Current assets

Short-term assets which constantly change in value such as stocks, debtors and bank balances.

Current liabilities

Short-term liabilities which are due to be paid in less than one year such as bank overdrafts and money owed to suppliers.

Current service cost

Officers employed during the year will have earned a year of pensionable service. The current service cost is the increase in the value of the pension scheme's liabilities arising from the employee service during the period.

Debtors

People who owe us money that is not paid by the end of the financial year.

Depreciation

The drop in the value of assets, for example, through wear and tear, age and becoming out of date.

Disclosure

Information we must show in the accounts under the Code.

Earmarked reserves

Money set aside for a specific purpose.

Fair value

The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

General reserves

Money set aside to be used in the future.

Historic cost

The cost of initial acquisition of an asset.

International Financial Reporting Standard (IFRS)

Standards on the way we need to treat certain items in our accounts.

Liabilities

Money we will have to pay to people or organisations in the future.

Material related-party transactions

Two or more organisations are 'related parties' if, during the year, one of them has some form of control over the other. By 'material' we mean of 'significant value'.

Minimum revenue provision (MRP)

The amount we must set aside to repay loans.

Net book value

The value of an asset after depreciation.

Non-current asset

An asset which is expected to be used for more than 12 months.

Non-distributed costs

Costs which are not allocated to specific services, according to the Service Expenditure Reporting Code of Practice.

Past service costs

The past service cost is the extra liability that arises when we grant extra retirement benefits that did not exist before, such as when we agree early retirement or extra years of service.

Pensions interest cost and expected return on assets

The pensions interest cost is the increase in the value of the liabilities that arise because those liabilities are one year closer to being paid. The return on assets is the value of the return expected to be achieved on the fund's investments in the long term.

Provisions

Money set aside to meet specific service liabilities and to meet spending.

Reserves

Savings we have built up from surpluses or by not spending income which has conditions on its use.

Return on assets

The return on assets is the value of the return we expect to achieve on the Pension Fund's investments in the long term.

Revaluation Reserve

This account contains the difference between the amount paid for assets and the amount that they are currently worth.

Revenue spending

Spending on the day-to-day running of services - mainly wages, running expenses of buildings and equipment, and debt charges. These costs are met from council tax, business rates, government grants and fees and charges.

Revenue expenditure funded by capital under statute (REFCUS)

Spending on assets that have a lasting value, for example land and buildings, but which we do not own.

Settlement costs

Settlement costs arise when we make a lump-sum payment to a scheme member in exchange for their rights to receive certain pension benefits.

Specific grants

Payments from external bodies to cover local authority spending on a particular service or project.

TUPE - Transfer of Undertakings (Protection of Employment)

Regulations to protect employees if the business in which they are employed changes hands. Its effect is to move employees and any liabilities associated with them from the old employer to the new employer by operation of law.

Unrealised

A change in the market value which does not actually take place until an asset is sold.
